2013 Q2 2014 Q2 2015 Q3 2018 Q3 2019 Q2 2020 Q2 2021 Q2

The chart displays the relationship between share price and the number of shares outstanding for a company from 2014 to 2021. The left y-axis represents the share price, ranging from 0.0 to 1.4. The right y-axis represents the number of shares outstanding, ranging from 0 to 60. The x-axis shows time in quarters, with labels for 14-06-30, 18-12-31, and 21-09-30. The price (blue area) starts at approximately 0.3 in mid-2014, peaks at nearly 1.3 in early 2015, and then declines to around 0.1 by late 2015. It remains relatively stable until early 2018, when it begins to rise, peaking at approximately 0.35 in late 2018. The price then declines to around 0.1 by early 2020, followed by a sharp increase to approximately 0.35 by late 2020. The share count (red dashed line) remains relatively stable at around 10 until late 2020, where it increases sharply to approximately 50 by early 2021.
