Ceragon Networks Ltd. provides wireless backhaul solutions that enable cellular operators and other wireless service providers to deliver voice and data services. Its wireless backhaul solutions use microwave and millimeter wave technology to transfer telecommunication traffic between base stations, small/distributed cells, and the core of the service provider's network. The company also offers wireless fronthaul solutions that use microwave technology for ultra-high speed, ultra-low latency communication for wireless 5G and 4G base stations. In addition, it provides IP-20 all-outdoor solutions, such as IP-20C, IP-20C-HP, IP-20S, IP-20E, and IP-20V; IP-20 split-mount/all-indoor solutions comprising IP-20N/IP-20A, IP-20F, and IP-20G; and IP-50 disaggregated solutions, including IP-50E, IP-50C, IP-50S, and IP-50FX for various short haul, long haul, fronthaul, and enterprise access applications. Further, the company offers
