

LIN.DE / Specialty Chemicals / GB / 2022-08-23

Linde plc operates as an industrial gas and engineering company in North and South America, Europe, the Middle East, Africa, and the Asia Pacific. It offers atmospheric gases, including oxygen, nitrogen, argon, and rare gases; and process gases, such as carbon dioxide, helium, hydrogen, electronic gases, specialty gases, and acetylene. The company also designs and constructs turnkey process plants for third-party customers, as well as for the gas businesses in various locations, such as olefin, natural gas, air separation, hydrogen, and synthesis gas plants. It serves a range of industries, including healthcare, energy, manufacturing, food, beverage carbonation, fiber-optics, steel making, aerospace, chemicals, and water treatment. The company was founded in 1879 and is based in Woking, the United Kingdom.

ECL / Specialty Chemicals / US / 2022-08-23

Ecolab Inc. provides water, hygiene, and infection prevention solutions and services in the United States and internationally. The company operates through Global Industrial, Global Institutional & Specialty, and Global Healthcare & Life Sciences segments. The Global Industrial segment offers water treatment and process applications, and cleaning and sanitizing solutions to manufacturing, food and beverage processing, transportation, chemical, metals and mining, power generation, pulp and paper, commercial laundry, petroleum, refining, and petrochemical industries. The Global Institutional & Specialty segment provides specialized cleaning and sanitizing products to the foodservice, hospitality, lodging, government and education, and retail industries. Its Global Healthcare & Life Sciences segment offers specialized cleaning and sanitizing products to the healthcare, personal care, and pharmaceutical industries, such as infection prevention and surgical solutions, and end-to-end cleaning and contamination control solutions under the Ecolab, Microtek, and Anios brand names. The company's Other segment offers pest elimination services to

IFF / Specialty Chemicals / US / 2022-08-23

International Flavors & Fragrances Inc., together with its subsidiaries, manufactures and sells cosmetic active and natural health ingredients for use in various consumer products in Europe, Africa, the Middle East, Greater Asia, North America, and Latin America. It operates through Nourish, Scent, Health & Biosciences, and Pharma Solutions segments. The Nourish segment offers natural and plant-based specialty food ingredients, such as flavor compounds, and savory solutions and inclusions. It also provides natural food protection ingredients consist of natural antioxidants and anti-microbials as well as beverages, sweets , and dairy products. The Scent segment provides fragrance compounds, which include fine fragrances comprising perfumes and colognes, as well as consumer fragrances; fragrance ingredients comprising synthetic and natural ingredients that could be combined with other materials to create fragrance and consumer compounds; and cosmetic active ingredients consisting of active and functional ingredients, botanicals, and delivery systems to support its customers' cosmetic and personal care product lines. The Health & Biosciences segment provides pharmaceutical ingredients for use in various consumer products in Europe, Africa, the Middle East, Greater Asia, North America, and Latin America. It operates through Nourish, Scent, Health & Biosciences, and Pharma Solutions segments. Sales, NI & Operating CF, quarterly

The chart displays the quarterly financial performance of the company from 2002 Q3 to 2021 Q3. The Y-axis represents the amount in millions (M), ranging from -500 M to 3,500 M. The X-axis shows the quarters. The legend indicates three components: revenue (dark blue), net income (light blue), and operating cash flow (pink). Revenue shows a steady increase over the years, with a significant jump starting around 2017, reaching over 3,000 M by 2021 Q3. Net income and operating cash flow also show growth, with operating cash flow reaching nearly 500 M in 2021 Q3.

WCH.DE / Specialty Chemicals / DE / 2022-08-23

Wacker Chemie AG, together with its subsidiaries, provides chemical products worldwide. It operates through four divisions: Wacker Silicones, Wacker Polymers, Wacker Biosolutions, and Wacker Polysilicon. The Wacker Silicones division offers silanes, siloxanes, silicone fluids, silicone emulsions, silicone elastomers, silicone resins, and pyrogenic silicas for use in construction, electronics, automotive, health, and renewable energy industries. The Wacker Polymers division provides binders and polymeric additives, such as dispersible polymer powder and vinyl acetate-ethylene dispersions, which are used in construction, paper, adhesive, paint, coating, and basic chemical industries. The Wacker Biosolutions division offers customized biotech and catalog products for fine chemicals, such as pharmaceutical proteins, vaccines, cyclodextrins, cysteine, polyvinyl acetate solid resins, and acetylacetone for pharmaceutical actives, food additives, and agrochemicals. The Wacker Polysilicon division produces hyperpure polysilicon for use in semiconductor and solar sectors. The company was founded in 1914 and is headquartered in Munich, Germany.

AKE.PA / Specialty Chemicals / FR / 2022-08-23

Arkema S.A. manufactures and sells specialty chemicals and advanced materials worldwide. The company operates through Adhesive Solutions, Advanced Materials, Coating Solutions, and Intermediates segments. It provides adhesive solutions for construction, renovation of buildings, DIY, durable goods, and packaging and non-woven applications; and supplies technologies used in building activities for businesses and individuals, including sealants, tiles, flooring adhesives and waterproofing systems, and technologies used in industry, which include automotive, textiles, glazing, flexible and rigid packaging, and hygiene markets. The company also offers advanced materials consisting of specialty polyamides and polyvinylidene fluoride; and performance additives, such as specialty surfactants and molecular sieves, organic peroxides, thiochemicals, and hydrogen peroxide for use in automotive and transportation, oil and gas, renewable energies, consumer goods, electronics, construction, coatings, animal nutrition, and water treatment sectors. In addition, it provides coating solutions comprising EU/US acrylics and coating resins; sartomer photocure

AVNT / Specialty Chemicals / US / 2022-08-23

Avient Corporation provides specialized formulator, services, and sustainable material solutions in the United States, Canada, Mexico, Europe, South America, and Asia. It operates through three segments: Color, Additives and Inks; Specialty Engineered Materials; and Distribution. The Color, Additives and Inks segment offers specialized color and additive concentrates in solid and liquid form for thermoplastics; dispersions for thermosets; and specialty inks. This segment products are used in various markets include medical, pharmaceutical devices, food packaging, personal care, cosmetics, transportation, building products, recreational, athletic apparel, construction, filtration, outdoor furniture, healthcare, wire, and cable. The Specialty Engineered Materials segment provides specialty polymer formulations, services, and solutions for designers, assemblers, and processors of thermoplastic materials; and long glass and carbon fiber technology to thermoset and thermoplastic composites. The Distribution segment distributes approximately 4,000 grades of engineering and commodity grade resins to custom injection molders and extruders. The company sells its products to a wide range of customers, including automotive, aerospace, medical, pharmaceutical, food packaging, personal care, cosmetics, transportation, building products, recreational, athletic apparel, construction, filtration, outdoor furniture, healthcare, wire, and cable.

FUL / Specialty Chemicals / US / 2022-08-23

Fuller Company, together with its subsidiaries, formulates, manufactures, and markets adhesives, sealants, coatings, polymers, tapes, encapsulants, additives, and other specialty chemical products worldwide. The company operates through three segments: Hygiene, Health and Consumable Adhesives; Engineering Adhesives; and Construction Adhesives. The Hygiene, Health and Consumable Adhesives segment produces and supplies specialty industrial adhesives such as, thermoplastic, thermoset, reactive, and water-based and solvent-based products for applications in various markets, including food and beverage containers, flexible packaging, consumer goods, package integrity and re-enforcement, and non-durable goods; corrugation, folding carton, tape and label, paper converting, envelopes, books, multi-wall bags, sacks, and tissue and towel; disposable diapers, feminine care, and medical garments; and health and beauty. The Engineering Adhesives segment produces and supplies high performance industrial adhesives such as reactive, light cure, two-part liquids, silicone, polyurethane, film, and fast cure products for applications in various markets, including automotive, construction, and industrial.

Cabot Corporation operates as a specialty chemicals and performance materials company. It operates through three segments: Reinforcement Materials, Performance Chemicals, and Purification Solutions. The company offers reinforcing carbons used in tires as a rubber reinforcing agent and performance additive, as well as in industrial products, such as hoses, belts, extruded profiles, and molded goods; and engineered elastomer composites. It also provides specialty carbons used in inks, coatings, plastics, adhesives, toners, batteries, and displays applications; masterbatch and conductive compound products for use in automotive, industrial, packaging, infrastructure, agriculture, consumer products, and electronics industries; inkjet colorants used in the inkjet printing applications; fumed silica used in adhesives, sealants, cosmetics, batteries, inks, toners, silicone elastomers, coatings, polishing slurries, and pharmaceuticals; fumed alumina used in various products, including inkjet media, lighting, coatings, cosmetics, and polishing slurries; and aerogel, a hydrophobic, silica-based particle for use in various thermal insulation and specialty applications.

Livent Corporation manufactures and sells performance lithium compounds primarily used in lithium-based batteries, specialty polymers, and chemical synthesis applications in North America, Latin America, Europe, the Middle East, Africa, and the Asia Pacific. The company offers lithium compounds for use in applications that have specific performance requirements, including battery-grade lithium hydroxide for use in high performance lithium-ion batteries; and butyllithium, which is used in the production of polymers and pharmaceutical products, as well as a range of specialty lithium compounds, including high purity lithium metal, which is used in non-rechargeable batteries and the production of lightweight materials for aerospace applications. It also provides lithium phosphate, pharmaceutical-grade lithium carbonate, high purity lithium chloride, and specialty organics; and lithium carbonate and lithium chloride for use as feedstock in the process of producing performance lithium compounds. The company was incorporated in 2018 and is headquartered in Philadelphia, Pennsylvania.

It develops PEEK and PAEK polymer solutions, and semi-finished and finished parts. The company also offers specialist solutions for medical device manufacturers; sells thermoplastic polymer components; and engages in trading activities. It serves automotive, aerospace, energy and industrial, manufacturing and engineering, electronics, and medical markets. Victrex plc was founded in 1993 and is headquartered in Thornton-Cleveleys, the United Kingdom.

KOP / Specialty Chemicals / US / 2022-08-23

Koppers Holdings Inc. provides treated wood products, wood preservation chemicals, and carbon compounds in the United States, Australasia, Europe, and internationally. The company operates through three segments: Railroad and Utility Products and Services (RUPS), Performance Chemicals (PC), and Carbon Materials and Chemicals (CMC). The RUPS segment procures and treats crossties, switch ties, and various types of lumber used for railroad bridges and crossings. It also provides rail joint bars to join rails together for railroads; transmission and distribution poles for electric and telephone utilities; and pilings. This segment also provides railroad services, such as engineering, design, repair, and inspection services for railroad bridges. The PC segment develops, manufactures, and markets copper-based wood preservatives, including micronized copper azole, micronized pigments, alkaline copper quaternary, amine copper azole, and chromated copper arsenate for decking, fencing, utility poles, construction lumber and timbers, and various agricultural uses; and supplies fire-retardant chemicals for pressure treatment of wood primarily for construction. The CMC segment provides

LWLG / Specialty Chemicals / US / 2022-08-23

Lightwave Logic, Inc., a development stage company, focuses on the development of photonic devices and non-linear optical polymer materials systems for fiber-optic data communications and optical computing markets in the United States. The company is involved in designing and synthesizing organic chromophores for use in its electro-optic polymer systems and photonic device designs. It also offers electro-optic modulators, which converts data from electric signals to optical signals for transmission over fiber-optic cables; and polymer photonic integrated circuits, a photonic device, which integrates various photonic functions on a single chip. In addition, the company provides the ridge waveguide modulator, a modulator that fabricates the waveguide within a layer of its electro-optic polymer system. It focuses on selling its products to electro-optic device manufacturers, such as telecommunications component and systems manufacturers, networking and switching suppliers, semiconductor companies, Web 2.0 media, computing companies, aerospace companies, and government agencies. The company was formerly known as Third-order Media, Inc. and was previously traded on the NASDAQ stock exchange under the symbol TDM.

VNTR / Specialty Chemicals / GB / 2022-08-23

Venator Materials PLC, together with its subsidiaries, manufactures and markets chemical products worldwide. It operates through Titanium Dioxide and Performance Additives segments. The Titanium Dioxide segment offers titanium dioxide (TiO₂), such as rutile, anatase, and ultrafine TiO₂ products for use in coatings, printing inks, PVC window frames, plastic masterbatches, cosmetics, pharmaceuticals, food, polyester and polyamide fibers, catalysts, and cosmetics products. The Performance Additives segment provides barium and zinc additives for use in coatings, films, paper and glass fiber reinforced plastics; and colored inorganic pigments comprising iron oxides, ultramarines, specialty inorganics chemicals, and driers for construction, coatings, plastics, cosmetics, inks, catalyst, and laminates. This segment also offers wood protection chemicals for use in residential and commercial applications; timber treatment chemicals for use in decking, fencing, and other residential outdoor wood structures; industrial construction products for use in telephone poles, saltwater piers and pilings; and water treatment businesses. Venator Materials PLC is a public company listed on the London Stock Exchange.

HWKN / Specialty Chemicals / US / 2022-08-23

Hawkins, Inc. blends, manufactures, and distributes chemicals and other specialty ingredients in the United States and internationally. It operates through three segments: Industrial, Water Treatment, and Health and Nutrition. The Industrial segment offers industrial chemicals, products, and services to agriculture, chemical processing, electronics, energy, food, pharmaceutical, and plating industries. This segment primarily provides acids, alkalis, and industrial and food-grade salts. It also receives, stores, and distributes various chemicals, such as liquid caustic soda, sulfuric acid, hydrochloric acid, urea, phosphoric acid, aqua ammonia, and potassium hydroxide. In addition, this segment manufactures sodium hypochlorite and agricultural products, as well as various food-grade products that include liquid phosphates, lactates, and other blended products; repackages water treatment chemicals and bulk industrial chemicals; and performs custom blending of chemicals, and contract and private label bleach packaging. The Water Treatment segment offers chemicals, equipment, and solutions for potable water, municipal and industrial wastewater, industrial process water, and water treatment.

Flexible Solutions International, Inc., together with its subsidiaries, develops, manufactures, and markets specialty chemicals that slow the evaporation of water in Canada, the United States, and internationally. The company operates in two segments, Energy and Water Conservation Products, and Biodegradable Polymers. The company offers thermal polyaspartates (TPAs) for oilfields to reduce scale and corrosion in various water systems; and for the agricultural industry to reduce fertilizer crystallization before, during, and after application, as well as to prevent crystal formation between fertilizer and minerals present in the soil. It also provides TPAs for irrigation to prevent early plugging of drip irrigation ports, reduce maintenance costs, and lengthen the life of equipment; and TPAs as additives for household laundry detergents, consumer care products, and pesticides. In addition, the company offers nitrogen conservation products for agriculture that slow down nitrogen loss from fields. Further, it provides HEATSAVR, a chemical product for use in swimming pools and spas that forms a thin and transparent layer on the water's surface; and WATERSAVR to

The chart displays quarterly financial data from 2000 Q1 to 2021 Q2. The y-axis represents millions of dollars, ranging from -0.5M to 2.0M. The x-axis shows the time period in quarters. The bars are stacked, with revenue (blue) at the top, net income (red) in the middle, and operating cash flow (green) at the bottom. A significant spike in net income is visible in 2018 Q2, reaching nearly 2.0M.

The chart displays the relationship between the price of shares and the number of shares outstanding over time. The left y-axis represents the price, ranging from 0.0 to 0.8. The right y-axis represents the number of shares outstanding, ranging from 40 M to 70 M. The x-axis shows time in quarters from 2002-12-31 to 2020-06-30. The price (blue area) shows a major peak around 2007, followed by a sharp decline and a subsequent recovery. The shares outstanding (orange line) shows a steady increase over the period, with a notable jump around 2007.

EnerTeck Corporation, through its subsidiary, EnerTeck Chemical Corp., manufactures, markets, and sells fuel borne catalytic engine treatment products for diesel engines in the United States and internationally. The company offers EnerBurn that functions as an engine treatment application by removing carbon deposits from the combustion surfaces of the engine and reducing further carbon deposit buildup to fleet and vessel operators. It also provides volumetric proportioning injection equipment, which is used to deliver proper dosage ratios of EnerBurn to the diesel fuel. The company's products are primarily used in on-road vehicles, locomotives, and diesel marine engines. Its principal target markets comprise trucking, heavy construction, maritime shipping, railroad, and mining industries, as well as federal, state, and international government applications. The company was formerly known as Gold Bond Resources, Inc. and changed its name to EnerTeck Corporation in November 2003. EnerTeck Corporation was incorporated in 1935 and is based in Stafford, Texas.

NMGX / Specialty Chemicals / US / 2022-08-23

Nano Magic Holdings Inc. develops, commercializes, and markets consumer and industrial products enabled by nanotechnology primarily in the United States. It operates through two segments, Product and Contract Services. The company offers anti-fogging towelettes to the military for safety, anti-fogging, and conditioning of lenses, masks, and head gears, as well as other applications, such as head's up displays; mar and stain resistant coatings for high end vitreous China tableware in restaurants, cruise ships, and casinos; clear protective coatings used on display panels and touch screens to remove fingerprints; protective and water repelling coatings for interior and exterior glass, and ceramic surfaces to clean and prevent scale and grime encrustation; and coatings for ceramic insulators for use in transit and underground subways systems to prevent caking of metal dust and greases on surfaces. It is also involved in the retail sale of liquid and towelette formulations for cleaning and protecting clear surfaces, such as electronic touchscreens, windshields, windows, mirrors, shower doors, eyeglasses, and sunglass lenses; and anti-fogging liquid formulations for application on lenses, mirrors, and other clear surfaces.

Gulf Resources, Inc., through its subsidiaries, manufactures and trades bromine and crude salt, chemical products, and natural gas in the People's Republic of China. It provides bromine for use in brominated flame retardants, fumigants, water purification compounds, dyes, medicines, and disinfectants. The company also offers crude salt for use as a material in alkali and chlorine alkali production; and for use in the chemical, food and beverage, and other industries. In addition, it manufactures and sells chemical products for use in oil and gas field exploration, oil and gas distribution, oil field drilling, papermaking chemical agents, and inorganic chemicals, as well as materials that are used for human and animal antibiotics. The company is founded in 2006 and is based in Shouguang, the People's Republic of China.

CXDC / Specialty Chemicals / US / 2022-08-23

China XD Plastics Company Limited, together with its subsidiaries, engages in the research, development, manufacture, and sale of modified plastics primarily for automotive applications in the People's Republic of China, and Dubai, the United Arab Emirates. Its modified plastics are used to fabricate various auto components, including exteriors consisting of automobile bumpers, rearview and sideview mirrors, and license plate parts; interiors, such as door panels, steering wheels, dashboards, glove compartments, and safety belt components; and functional components comprising air conditioner casings, heating and ventilation casings, engine covers, and air ducts. The company also offers engineered plastics and environment-friendly plastics for use in oilfield equipment, mining equipment, vessel propulsion systems, and power station equipment; and polymer composite materials. Its products are also used in high-speed railways, airplanes, ships, and electronic appliances. The company sells its products through distributors, as well as directly to end customers. China XD Plastics Company Limited was founded in 1985 and is headquartered in Huzhou, the People's Republic of China.

Zymergen Inc. design, develop, and commercialize microbes, molecules, and materials. It offers an automation solution comprising reconfigurable automation carts, a modular hardware building blocks that allow for assembly of work cells customized for the particular needs of a lab; and automation control software, a cloud-based software used to control integrated automation systems. It serves electronics, packaging, healthcare, agriculture, and other industries. Zymergen Inc. was incorporated in 2013 and is based in Emeryville, California.

TREC / Specialty Chemicals / US / 2022-08-23

Trecora Resources manufactures and sells various specialty petrochemicals products and specialty waxes in the United States. It operates through two segments, Specialty Petrochemicals and Specialty Waxes. The Specialty Petrochemicals segment offers hydrocarbons and other petroleum-based products, such as isopentane, normal pentane, isohexane, and hexane used in the production of polyethylene, packaging, polypropylene, expandable polystyrene, poly-iso/urethane foams, crude oil from the Canadian tar sands, and in the catalyst support industry. It also owns and operates natural gas pipelines. The Specialty Waxes segment provides specialty polyethylene waxes for use in the paints and inks, adhesives, coatings, and PVC lubricants; and specialized synthetic poly alpha olefin waxes for use as toner in printers and as additives for candles. This segment also provides custom processing services. The company was formerly known as Arabian American Development Company and changed its name to Trecora Resources in June 2014. Trecora Resources was incorporated in 1967 and is headquartered in Sugar Land, Texas.

BLB / Specialty Chemicals / US / 2022-08-23

Kraig Biocraft Laboratories, Inc. engages in developing protein-based fibers using recombinant DNA technology for commercial applications in the technical textile and specialty fiber industries in the United States. The company's products are used in military and police applications for ballistic protection; industrial applications, including critical cables and abrasion/impact resistant components; safety equipment; and composite materials for the aero-space industry. Its products are also used in various markets, such as medical textiles, geotextiles, defense and military textiles, safe and protective clothing, filtration textiles, composites with textile structure, and functional and sportive textiles, as well as textiles used in buildings and transportation. The company was incorporated in 2006 and is headquartered in Ann Arbor, Michigan.

GRA / Specialty Chemicals / US / 2022-08-23

W. R. Grace & Co., through its subsidiaries, produces and sells specialty chemicals and materials worldwide. It operates through two segments, Grace Catalysts Technologies and Grace Materials Technologies. The Grace Catalysts Technologies segment offers fluid catalytic cracking (FCC) catalysts for the production of transportation fuels, such as gasoline and diesel fuels, and petrochemicals; and FCC additives. This segment also provides hydro processing catalysts used in process reactors to upgrade heavy oils into lighter products; polyolefin and chemical catalysts used for the production of polypropylene and polyethylene thermoplastic resins; and chemical catalysts, as well as gas-phase polypropylene process technology to manufacture polypropylene products. The Grace Materials Technologies segment offers silica-based and silica-alumina-based materials for use in consumer/pharma, coatings, and chemical process applications. W. R. Grace & Co. was founded in 1854 and is headquartered in Columbia, Maryland.

L'Air Liquide S.A. provides gases, technologies, and services for the industrial and health sectors in Europe, the Americas, the Asia Pacific, the Middle East, and Africa. The company's Gas & Services segment offers oxygen, nitrogen, argon, hydrogen, and carbon monoxide to the metals, chemicals, refining, and energy sectors; and gases, application equipment, and associated services to the materials and energy, automotive and manufacturing, food and pharmaceuticals, technology and research, and craftsmen and retail sectors. It also supplies medical gases, hygiene products, equipment, and services to hospitals, as well as to patients in their homes; and produces and distributes healthcare specialty ingredients for the cosmetics, pharmaceutical, and vaccine markets. In addition, this segment supplies gases, materials, and services for use in the production of semi-conductors, as well as flat screens and photovoltaic panels. Its Engineering & Construction segment designs, develops, and builds industrial gas production plants for third parties; and designs and manufactures plants in the traditional, renewable, and alternative energy sectors. The

IMCD.AS / Specialty Chemicals / NL / 2022-08-23

IMCD N.V. distributes, markets, and sells specialty chemicals and ingredients in the Netherlands, rest of Europe, the Middle East, Africa, North America, South America, and the Asia-Pacific. The company offers enzymes, surfactants, biocides, chelates, rheology modifiers, solubilisers, silicones, solvents, and functional additives; active pharmaceutical, agrochemicals, biopharma, excipients and formulation, nutraceuticals, and regulated synthesis; actives, UV sunscreens, rheology modifiers, thickeners, emulsifiers, emollients, elastomers, humectants, waxes, film formers, functional powders, hair styling polymers, hair conditioners, solvents, solubilizers, pigments, pearls, colorants, opacifiers, pearlisers, preservatives, antioxidants, additives, fragrances, and essential oils; and resins and binders, additives, functional fillers, and specialty solvents. It also provides taste, texture, nutrition, and function; base oil, fuel additive, lubricants additive, lubricants finished fluids, solvents, degreasers and fuel, compounds, and upstream, midstream and downstream oil, gas and energy; bio-based chemicals, catalysts, intermediates,

Holland Colours N.V., together with its subsidiaries, manufactures, distributes, and sells color concentrates in Europe, the Middle East, India, Africa, the Americas, Asia, Australia, and New Zealand. The company offers colorants for the building and construction industry, including profiles, pipes, tubing and fittings, sheets, siding, cladding, sealants, flooring, and insulation, as well as solutions for a wide range of polymers. It also provides colorants for packaging applications comprising water, carbonated soft drinks, fruit juices, dairy, beer, wine, dry food, detergents, pharmaceutical, and cosmetic and personal care products. In addition, the company offers tinting solutions for industrial and decorative coatings; and colorants for other markets, such as adhesives, shopping bags, polybags, mulch films, OPP tapes, PU flexible foams, synthetic leather, fiber glass and buttons, paving blocks, artificial stones, cast PMMA, PP non-woven and spunbond, coatings, flexible PVCs, prosthetics, glass fiber reinforced nylon, and silicone rubber and elastomers. It sells its products through a network of agents and distributors. The company was founded in 1970 and is headquartered in Rotterdam, Netherlands.

SIKA.SW / Specialty Chemicals / CH / 2022-08-23

Sika AG, a specialty chemicals company, develops, produces, and sells systems and products for bonding, sealing, damping, reinforcing, and protecting in the building sector and automotive industry worldwide. It offers tile adhesives and grouts, and systems for under-tile waterproofing and sound reduction, as well as renders and decorative finishes for exterior and interior walls; and develops and markets various admixtures and additives for use in concrete, cement, and mortar production, as well as flat roofing systems. The company also provides a range of technologies used for below and aboveground waterproofing, including flexible membrane systems, liquid applied membranes, joint waterproofing systems, waterproofing mortars and mortar admixtures, and injection resins and grouts for use in various markets, such as commercial and residential basements, tunnels, bridges, and various types of water-retaining structures, such as reservoirs, storage basins, and storage tanks. Further, it offers flooring solutions, such as synthetic resin and cementitious systems for industrial and commercial buildings; and sealants, tapes, spray

Essentra plc provides essential components and solutions worldwide. The Components division manufactures and distributes plastic injection molded, vinyl dip-molded, and metal items for equipment manufacturing, automotive, fabrication, electronics, and construction industries; and component solutions comprising caps and plugs, wire and cable management products, flange protection products, knobs, handles and grips, PCB and electronics hardware, and tools and precision instruments for a range of applications and industries that are used in protection and finish products. The Packaging division provides cartons, leaflets, self-adhesive labels, and printed foils for use in blister packs; and packaging and authentication solutions to the health and personal care sectors. The Filter division offers filters and packaging solutions to the roll own segments; analytical laboratory services; and e-cigarette and heat not burn solutions for next generation products. The company was formerly known as Filtrona plc and changed its name to Essentra plc in June 2013. Essentra plc was incorporated in 2005 and is based in Milton Keynes, the United Kingdom.

SYNT.L / Specialty Chemicals / GB / 2022-08-23

Synthomer plc operates as a specialty chemicals company. It operates through four segments: Performance Elastomers, Functional Solutions, Industrial Specialities, and Acrylate Monomers. The company offers pressure sensitive adhesives, acrylic polymers, acrylic dispersions, saturants, release coatings, and other adhesives; water-based carboxylated styrene butadiene rubber, redispersible powder, flooring adhesive, and additives for construction applications; and impregnation binders, styrene butadiene copolymers, dispersions, polymer binders, and butadiene-based binders for textiles applications. It also provides binders for various carpets; synthetic binders for graphic, packaging, and specialty paper coating applications; paper coating additives and plastic pigments; binders, dispersions, water-based and solvent-borne resins, and other products for various coating applications; foamed bedding products and footwear; elastomeric modifiers for thermoplastics and friction components; reinforcement resins for rubber compounds; and latex for tire cord. In addition, the company offers compounds and aqueous curing pastes for carpets

Zotefoams plc, together with its subsidiaries, manufactures, distributes, and sells polyolefin block foams in the United Kingdom, Continental Europe, North America, and internationally. The company operates through Polyolefin Foams, High-Performance Products, and MuCell Extrusion LLC segments. It offers AZOTE, a polyolefin foam under the Plastazote, Evazote, and Supazote brands; and various high-performance foams manufactured from fluoropolymers, engineering polymers, and specialty elastomers under the ZOTEK brand. The company also provides T-FIT, a clean insulation system that is used in the pharmaceutical, biotech, and semiconductor cleanroom industries. In addition, it owns and licenses patented MuCell microcellular foam technology, as well as sells related machinery. The company primarily serves the automotive, aerospace, product protection, industrial parts, marine, building and construction, military, and sports and leisure industries. Zotefoams plc was founded in 1921 and is headquartered in Croydon, the United Kingdom.

ZYM-B.CO / Specialty Chemicals / DK / 2022-08-23

Novozymes A/S produces and sells industrial enzymes, microorganisms, and probiotics in Europe, the Middle East, Africa, North America, the Asia Pacific, and Latin America. The company offers baking, beverages, dairy, starch, and protein solutions for the food and beverage industry; laundry, dishwashing, and professional cleaning solutions for the household care industry; agriculture solutions, including crop production, and animal health and nutrition solutions; bioyield and biocontrol solutions for crops; and grain and technical processing solutions, as well as bio energy solutions for liquefaction, saccharification, fermentation, fiber conversion, and biomass conversion. It also provides textile solutions, such as biopreparation, biopolishing, bleach clean-up, denim abrasion and finishing, and desizing solutions. In addition, the company offers solutions for pulp & paper, including fiber modification, bleach boosting, deposit control, starch modification, and deinking; leather solutions comprising acid bating, area expansion, bating, degreasing, soaking, and unhairing and liming; and water and waste management solutions, which

Gurit Holding AG, together with its subsidiaries, develops, manufactures, and sells advanced composite materials, composite tooling equipment, and kitting services in Switzerland and internationally. The company operates in four segments: Tooling, Kitting, Composite Materials, and Aerospace. It offers pre-impregnated materials, structural core products, gel coats, adhesives, resins, and consumables; flame retardant materials; and liquid and filled systems. The company also provides reinforcements; ancillaries products; and other products comprising B³ SmartPac, a construction solution that enables builders to manufacture composite components, as well as Hi-Panels, which are epoxy infused composite panels. In addition, it offers wind turbine blade repair products; and tooling products consisting of wind blade master plugs, wind blade moulds, mould heating systems, wind blade hinge systems, and shear-web aligning and clamping system, as well as mould alignment, clamping, aircraft interiors, and secondary structure products. Further, the company provides composite engineering, contact tooling, manufacturing, and tooling services, as well as other products.

JMAT.L / Specialty Chemicals / GB / 2022-08-23

Johnson Matthey Plc provides specialty chemicals in the United States, Germany, rest of Europe, the United States, rest of North America, China, rest of Asia, and internationally. It operates through four segments: Clean Air, Efficient Natural Resources, Health, and New Markets. The Clean Air segment provides catalysts for emission control after-treatment systems to remove harmful emissions from vehicles. This segment also offers catalysts for light duty vehicles powered by diesel and gasoline, heavy duty diesel trucks, buses, and non- road equipment. The Efficient Natural Resources segment provides products and processing services for the use and transformation of critical natural resources including oil, gas, biomass, and platinum group metals. The Health segment develops and manufactures active pharmaceutical ingredients (API) for various treatments. The New Markets segment offers battery materials, battery systems, and fuel cell technologies; science and technology to develop the products for devices used in medical procedures; and catalysts to pharmaceutical and agricultural chemicals markets. The company was founded in 1844 and is headquartered in London, United Kingdom.

CRDA.L / Specialty Chemicals / GB / 2022-08-23

Cruda International Plc creates, makes, and sells specialty chemicals in Europe, the Middle East, Africa, North America, Asia, and Latin America. It operates through four segments: Consumer Care, Life Sciences, Performance Technologies, and Industrial Chemicals. The company offers adhesives; crop protection additives and adjuvants, seed enhancement and animal health chemicals, chemical bio-stimulants, and specialty additives for agricultural films; and lubricant additives, coatings and polymers, vehicle cleaning chemicals, and products for automotive textiles and fibers, as well as specialty additives for plastics, and battery and catalyst industries. It also provides specialty ingredients for self-tanning, color cosmetics, bath and shower, deodorants, anti-perspirants, depilatories, men's grooming, and oral hygiene, as well as skin, hair, sun, body, and baby care applications; construction chemicals and bitumen additives; dietary supplements; and materials and polymer additives for electronics and devices. In addition, the company offers chemistries, emulsifiers, fuel and power generation additives, and polymer additives; food additives; specialty
