

ENBBF / Oil & Gas Midstream / CA / 2022-08-23

Enbridge Inc. operates as an energy infrastructure company. The company operates through five segments: Liquids Pipelines, Gas Transmission and Midstream, Gas Distribution and Storage, Renewable Power Generation, and Energy Services. The Liquids Pipelines segment operates pipelines and related terminals to transport various grades of crude oil and other liquid hydrocarbons in Canada and the United States. The Gas Transmission and Midstream segment invests in natural gas pipelines, and gathering and processing facilities in Canada and the United States. The Gas Distribution and Storage segment is involved in natural gas utility operations serving residential, commercial, and industrial customers in Ontario, as well as natural gas distribution and energy transportation activities in Quebec. The Renewable Power Generation segment operates power generating assets, such as wind, solar, geothermal, and waste heat recovery facilities; and transmission assets in North America and Europe. The Energy Services segment provides energy marketing services to refiners, producers, and other customers; and physical commodity trading and transportation services in Canada and the United States.

Enterprise Products Partners L.P. provides midstream energy services to producers and consumers of natural gas, natural gas liquids (NGLs), crude oil, petrochemicals, and refined products. The company operates through four segments: NGL Pipelines & Services, Crude Oil Pipelines & Services, Natural Gas Pipelines & Services, and Petrochemical & Refined Products Services. The NGL Pipelines & Services segment offers natural gas processing and related NGL marketing services. It operates 19 natural gas processing facilities located in Colorado, Louisiana, Mississippi, New Mexico, Texas, and Wyoming; NGL pipelines; NGL fractionation facilities; NGL and related product storage facilities; and NGL marine terminals. The Crude Oil Pipelines & Services segment operates crude oil pipelines; and crude oil storage and marine terminals, which include a fleet of 255 tractor-trailer tank trucks that are used to transport crude oil. It also engages in crude oil marketing activities. The Natural Gas Pipelines & Services segment operates natural gas pipeline systems to gather, treat, and transport natural gas. It leases underground salt dome natural gas storage facilities in New Mexico and Texas.

TC Energy Corporation operates as an energy infrastructure company in North America. It operates through Canadian Natural Gas Pipelines, U.S. Natural Gas Pipelines, Mexico Natural Gas Pipelines, Liquids Pipelines, and Power and Storage segments. The company builds and operates 93,400 km network of natural gas pipelines, which transports natural gas from supply basins to local distribution companies, power generation plants, industrial facilities, interconnecting pipelines, LNG export terminals, and other businesses. It also has regulated natural gas storage facilities with a total working gas capacity of 535 billion cubic feet. In addition, it has approximately 4,900 km liquids pipeline system that connects Alberta crude oil supplies to refining markets in Illinois, Oklahoma, Texas, and the U.S. Gulf Coast. Further, the company owns or has interests in seven power generation facilities with a combined capacity of approximately 4,200 megawatts that are powered by natural gas and nuclear fuel sources located in Alberta, Ontario, Québec, and New Brunswick; and owns and operates approximately 118 billion cubic feet of non-regulated natural gas storage capacity in Alberta, which is used in all distribution with

Energy Transfer LP provides energy-related services. The company owns and operates approximately 11,600 miles of natural gas transportation pipeline, and three natural gas storage facilities in Texas and two natural gas storage facilities located in the state of Texas and Oklahoma; and 19,830 miles of interstate natural gas pipeline. It also sells natural gas to electric utilities, independent power plants, local distribution and other marketing companies, and industrial end-users. The company owns and operates natural gas gathering and natural gas liquid (NGL) pipeline, processing plant, and treating and conditioning facilities in Texas, New Mexico, West Virginia, Pennsylvania, Ohio, Oklahoma, Arkansas, Kansas, and Louisiana; natural gas gathering, oil pipeline, and oil stabilization facilities in South Texas; and a natural gas gathering system in Ohio, as well as transport and supplies water to natural gas producer in Pennsylvania. It owns approximately 5,215 miles of NGL pipeline; NGL and propane fractionation facilities; NGL storage facilities with working storage capacity of approximately 50 million barrels (MMBbls); and the NGL pipeline system with capacity of approximately 50 million barrels (MMBbls) per day.

MPLX / Oil & Gas Midstream / US / 2022-08-23

MPLX LP owns and operates midstream energy infrastructure and logistics assets primarily in the United States. It operates in two segments, Logistics and Storage, and Gathering and Processing. The company is involved in the gathering, processing, and transportation of natural gas; gathering, transportation, fractionation, exchange, storage, and marketing of natural gas liquids; gathering, storage, transportation, and distribution of crude oil and refined products, as well as other hydrocarbon-based products; and sale of residue gas and condensate. It also engages in the inland marine businesses comprising transportation of light products, heavy oils, crude oil, renewable fuels, chemicals, and feedstocks in the Mid-Continent and Gulf Coast regions, as well as owns and operates boats and barges, including third-party chartered equipment, and a marine repair facility located on the Ohio River; and distribution of fuel, as well as operates refining logistics, terminals, rail facilities, and storage caverns. In addition, the company operates terminal facilities for the receipt, storage, blending, and distribution of liquid hydrocarbons, and the receipt, storage, and distribution of solid hydrocarbons.

OKE / Oil & Gas Midstream / US / 2022-08-23

ONEOK, Inc., together with its subsidiaries, engages in gathering, processing, storage, and transportation of natural gas in the United States. It operates through Natural Gas Gathering and Processing, Natural Gas Liquids, and Natural Gas Pipelines segments. The company owns natural gas gathering pipelines and processing plants in the Mid-Continent and Rocky Mountain regions. It also gathers, treats, fractionates, and transports natural gas liquids (NGL), as well as stores, markets, and distributes NGL products. The company owns NGL gathering and distribution pipelines in Oklahoma, Kansas, Texas, New Mexico, Montana, North Dakota, Wyoming, and Colorado; terminal and storage facilities in Kansas, Missouri, Nebraska, Iowa, and Illinois; and NGL distribution and refined petroleum products pipelines in Kansas, Missouri, Nebraska, Iowa, Illinois, and Indiana, as well as owns and operates truck- and rail-loading, and -unloading facilities connected to NGL fractionation, storage, and pipeline assets. In addition, it operates regulated interstate and intrastate natural gas transmission pipelines and natural gas storage facilities. Further, the company

PBA / Oil & Gas Midstream / CA / 2022-08-23

Pembina Pipeline Corporation provides transportation and midstream services for the energy industry. It operates through three segments: Pipelines, Facilities, and Marketing & New Ventures. The Pipelines segment operates conventional, oil sands and heavy oil, and transmission assets with a transportation capacity of 3.1 millions of barrels of oil equivalent per day, ground storage of 11 millions of barrels, and rail terminalling capacity of approximately 105 thousands of barrels of oil equivalent per day serving markets and basins across North America. The Facilities segment offers infrastructure that provides customers with natural gas, condensate, and natural gas liquids (NGLs), including ethane, propane, butane, and condensate; and includes 354 thousands of barrels per day of NGL fractionation capacity, 21 millions of barrels of cavern storage capacity, and associated pipeline and rail terminalling facilities. The Marketing & New Ventures segment buys and sells hydrocarbon liquids and natural gas originating in the Western Canadian sedimentary basin and other basins. Pembina Pipeline Corporation was incorporated in 1954 and is headquartered in Calgary, Alberta, Canada.

Plains All American Pipeline, L.P., through its subsidiaries, engages in the pipeline transportation, terminalling, storage, and gathering of crude oil and natural gas liquids (NGL) in the United States and Canada. The company operates in two segments, Crude Oil and NGL. The Crude Oil segment offers gathering and transporting crude oil through pipelines, gathering systems, trucks, and at times on barges or railcars. This segment provides terminalling, storage, and other facilities-related services, as well as merchant activities. As of December 31, 2021, this segment owned and leased 18,300 miles of active crude oil transportation pipelines and gathering systems, as well as an additional 110 miles of pipelines that supports crude oil storage and terminalling facilities; 74 million barrels of commercial crude oil storage capacity; 38 million barrels of active, above-ground tank capacity; four marine facilities; a condensate processing facility; seven crude oil rail terminals and 2,100 crude oil railcars; and 640 trucks and 1,275 trailers. The Natural Gas Liquids segment engages in the natural gas processing, NGL fractionation, storage, transportation, and terminalling activities. As of December 31, 2021,

DCP Midstream, LP, together with its subsidiaries, owns, operates, acquires, and develops a portfolio of midstream energy assets in the United States. The company operates through Logistics and Marketing, and Gathering and Processing. The Logistics and Marketing segment engages in transporting, trading, marketing, and storing natural gas and natural gas liquids (NGLs); and fractionating NGLs. The Gathering and Processing segment is involved in gathering, compressing, treating, and processing natural gas; producing and fractionating NGLs; and recovering condensate. The company owns and operates approximately 35 natural gas processing plants. It serves petrochemical and refining companies, and retail propane distributors. The company was formerly known as DCP Midstream Partners, LP and changed its name to DCP Midstream, LP in January 2017. DCP Midstream, LP was incorporated in 2005 and is headquartered in Denver, Colorado.

Magellan Midstream Partners, L.P. engages in the transportation, storage, and distribution of refined petroleum products and crude oil in the United States. It operates through Refined Products and Crude Oil segments. The company operates refined products pipeline that transports gasoline, diesel fuel, aviation fuel, kerosene, and heating oil to wholesalers, retailers, traders, railroads, airlines, and regional farm cooperatives; and to end markets, including retail gasoline stations, truck stops, farm cooperatives, railroad fueling depots, military bases, and commercial airports. Further, it provides pipeline capacity and tank storage services, as well as terminalling, ethanol and biodiesel unloading and loading, additive injection, custom blending, laboratory testing, and data services to shippers. In addition, the company owns and operates crude oil pipelines and storage facilities; and marine terminals located along coastal waterways that provide design, installation, construction, testing, operation, replacement, and management of assets to refiners, marketers, and traders. As of December 31, 2021, it had 9,800-mile refined products pipeline system with 54 terminals and 2,200 storage tanks.

Enable Midstream Partners, LP owns, operates, and develops midstream energy infrastructure assets in the United States. The company operates in two segments, Gathering and Processing; and Transportation and Storage. The Gathering and Processing segment provides natural gas gathering, processing, and fractionation services in the Anadarko, Arkoma, and Ark-La-Tex basins, as well as crude oil gathering services in the Bakken Shale formation of the Williston Basin for its producer customers. The Transportation and Storage segment offers interstate and intrastate natural gas pipeline transportation and storage services to natural gas producers, utilities, and industrial customers. The company's natural gas gathering and processing assets are located in Oklahoma, Texas, Arkansas, and Louisiana; crude oil gathering assets are located in North Dakota; and natural gas transportation and storage assets extend from western Oklahoma and the Texas Panhandle to Louisiana, from Louisiana to Illinois, in Oklahoma, and from Louisiana to Alabama. As of December 31, 2018, its portfolio of midstream energy infrastructure assets included approximately 12,000 miles of gathering and processing assets, 12,000 miles of transportation and storage assets, and 12,000 miles of storage assets.

ETRN / Oil & Gas Midstream / US / 2022-08-23

Equitrans Midstream Corporation owns, operates, acquires, and develops natural gas gathering, transmission and storage, and water services assets in the Appalachian Basin. It operates through three segments: Gathering System, Transmission and Storage System, and Water Service System. The Gathering System segment include 1,130 miles of high-pressure gathering lines with compression of approximately 485,000 horsepower and multiple interconnect points; and approximately 910 miles of Federal Energy Regulatory Commission (FERC) low-pressure gathering lines. The Transmission and Storage System segment comprises 950 miles of FERC regulated interstate pipeline that connects to seven interstate pipelines and local distribution companies. The Water Service System segment include two independent systems comprised approximately 200 miles of pipeline that deliver fresh water from the Monongahela River, the Ohio River, local reservoirs, and various regional waterways. Equitrans Midstream Corporation was incorporated in 1988 and is headquartered in Canonsburg, Pennsylvania.

NGL Energy Partners LP engages in the crude oil and liquids logistics, and water solution businesses. The company's Crude Oil Logistics segment purchases crude oil from producers and marketers, and transports it to refineries for resale at pipeline injection stations, storage terminals, barge loading facilities, rail facilities, refineries, and other trade hubs; and provides storage, terminaling, and pipeline transportation services. Its Water Solutions segment transports, treats, recycles, and disposes produced and flowback water generated from oil and natural gas production; disposes solids, such as tank bottoms, and drilling fluid and muds, as well as performs truck and frac tank washouts; and sells produced water for reuse and brackish non-potable water. The company's Liquids Logistics segment supplies natural gas liquids, refined petroleum products, and biodiesel to commercial, retail, and industrial customers in the United States and Canada through its 28 terminals, third-party storage and terminal facilities, and common carrier pipelines, as well as through fleet of leased railcars. This segment is also involved in the marine export of butane through its facility located in Charlotte, Virginia through its fleet of marine vessels.

Its Transportation segment operates a fleet of 570 tank trucks and 1,200 trailers; and 29 inland marine tank barges, 14 inland push boats, and 1 articulated offshore tug and barge unit to transport petroleum products and by-products, petrochemicals, and chemicals. The company's Sulfur Services segment processes molten sulfur into prilled or pelletized sulfur, which is used in the production of fertilizers and industrial chemicals. Its Natural Gas Liquids segment stores, distributes, and transports natural gas liquids for wholesale distribution to refineries and industrial NGL users.

MMLP / Oil & Gas Midstream / US / 2022-08-23

Martin Midstream Partners L.P., together with its subsidiaries, engages in terminalling, processing, storage, and packaging of petroleum products and by-products primarily in the United States Gulf Coast region. The company's Terminalling and Storage segment owns or operates 15 marine shore-based terminal facilities and 13 specialty terminal facilities that provide storage, refining, blending, packaging, and handling services for producers and suppliers of petroleum products and by-products. This segment also offers land rental services to oil and gas companies, as well as storage and handling services for lubricants and fuels. Its Transportation segment operates a fleet of 570 tank trucks and 1,200 trailers; and 29 inland marine tank barges, 14 inland push boats, and 1 articulated offshore tug and barge unit to transport petroleum products and by-products, petrochemicals, and chemicals. The company's Sulfur Services segment processes molten sulfur into prilled or pelletized sulfur, which is used in the production of fertilizers and industrial chemicals. Its Natural Gas Liquids segment stores, distributes, and transports natural gas liquids for wholesale distribution to refineries and industrial NGL users.

Targa Resources Corp., together with its subsidiary, Targa Resources Partners LP, owns, operates, acquires, and develops a portfolio of midstream energy assets in North America. It operates in two segments, Gathering and Processing, and Logistics and Transportation. The company engages in gathering, compressing, treating, processing, transporting, and selling natural gas; storing, fractionating, treating, transporting, and selling natural gas liquids (NGL) and NGL products, including services to liquefied petroleum gas exporters; and gathering, purchasing, storing, terminaling, and selling crude oil. It is also involved in the purchase and resale of NGL products; and wholesale of propane, as well as provision of related logistics services to multi-state retailers, independent retailers, and other end-users. In addition, the company offers NGL balancing services; and transportation services to refineries and petrochemical companies in the Gulf Coast area, as well as purchases, markets, and resells natural gas. It operates approximately 28,400 miles of natural gas pipelines, including 42 owned and operated processing plants; and owns or operates a total of 624 miles of oil pipelines.

NNA / Oil & Gas Midstream / MC / 2022-08-23

Navios Maritime Acquisition Corp. engages in the marine transportation business. The firm owns a fleet of modern crude oil, refined petroleum product and chemical tankers providing marine transportation services around the world. The firm charters its vessels to international oil companies, refiners and vessel operators under long, medium and short-term charters. The firm's fleet includes approximately 38 double-hulled tanker vessels, aggregating approximately four million deadweight tons (dwt). The fleet includes approximately eight very large crude carrier (VLCC) tankers, which transport crude oil, and over eight Long Range 1 (LR1) product tankers; approximately 18 Medium Range 2 (MR2) product tankers, and over four chemical tankers, which transport refined petroleum products and bulk liquid chemicals. Its vessels include Nave Constellation, Nave Universe, Nave Polaris, Nave Cosmos, Nave Velocity, Nave Sextans, Nave Pyxis, Nave Luminosity, Nave Jupiter and Nave Pulsar.
