The Toro Company engages in the designing, manufacturing, marketing, and selling professional and residential equipment worldwide. The company's Professional segment offers turf and landscape equipment products, including sports fields and grounds mowing and maintenance equipment, golf course mowing and maintenance equipment, landscape contractor mowing equipment, landscape creation and renovation equipment, and other maintenance equipment; rental, specialty, and underground construction equipment; and snow and ice management equipment, such as snowplows, brush, snow thrower attachment, salt and sand spreaders, and related parts and accessories for light and medium duty trucks, utility task vehicles, skid steers, and front-end loaders. It also provides irrigation and lighting products that consist of sprinkler heads, electric and hydraulic valves, controllers, computer irrigation central control systems, coupling systems, and ag-irrigation drip tape and hose products, as well as professionally installed landscape lighting products offered through distributors and landscape contractors. This segment also includes maintenance equipment for

RBC Bearings Incorporated manufactures and markets engineered precision bearings and components in the United States and internationally. It operates through two segments, Aerospace/Defense and Industrial. The company produces plain bearings with self-lubricating or metal-to-metal designs, including rod end bearings, spherical plain bearings, and journal bearings; roller bearings, such as tapered roller bearings, needle roller bearings, and needle bearing track rollers and cam followers, which are anti-friction products that are used in industrial applications and military aircraft platforms; and ball bearings include high precision aerospace, airframe control, thin section, and industrial ball bearings that utilize high precision ball elements to reduce friction in high-speed applications. It also offers mounted bearing products include mounted ball bearings, mounted roller bearings, and mounted plain bearings; and enclosed gearing product lines, including quantis gearmotor, torque arm, tigear, magnagear & maxum, and controlled start transmission. In addition, the company produces power transmission components include
