Voltronic Power Technology Corp. primarily designs, manufactures, markets, introduces, and sells uninterruptible power systems (UPS) in Taiwan and China. The company provides DC, standby, line interactive, and online UPS products; and solar power products, solar inverters, automatic voltage regulators, chargers, and accessories. It also offers ODM design and manufacturing of inverters. The company primarily serves the power market. The company was founded in 2008 and is headquartered in Taipei, Taiwan.

Nexans S.A. manufactures and sells cables in France and internationally. It operates through four segments: Building & Territories, High Voltage & Projects, Telecom & Data, and Industry & Solutions. The Building & Territories segment provides cabling systems and smart energy solutions for buildings, smart cities/grids, e-mobility, local infrastructures, decentralized energy systems, and rural electrifications. The High Voltage & Projects segment offers design, engineering, financing, asset management, and systems management solutions for offshore wind farms, subsea interconnections, and land high voltage, as well as smart solutions for the oil and gas sector. The Telecom & Data segment helps customers to deploy copper and fiber optic infrastructures, which include data transmission, telecom networks, hyperscale data centers, and LAN cabling solutions. The Industry & Solutions segment provides customized cabling and connectivity solutions to support OEMs and industrial infrastructure project managers in transport, automatic devices, renewable energy, resources, and other sectors. It also offers wire rods, electrical wires, and winding

LEM Holding SA, together with its subsidiaries, provides solutions for measuring electrical parameters in China, the United States, Germany, Japan, Italy, Switzerland, and internationally. It operates in two segments, Industry and Automotive. The Industry segment develops, manufactures, and sells electronic components called transducers for the measurement of current and voltage of various industrial applications. The Automotive segment develops, manufactures, and sells transducers for applications in automotive markets. The company also offers energy meters; smart electronic battery sensors and shunts; and integrators. Its products are used in various applications, such as drives, welding, renewable energies, power supplies, traction, high-precision, trackside, automation, automotive battery management and motor control, smart grid, electric vehicle chargers, conventional and green cars businesses, as well as for AC/DC converters, uninterrupted power supply systems for computers, micro turbines, and wind and solar power generation. The company was founded in 1972 and is based in Plan-les-Ouates, Switzerland.

Tecogen Inc. designs, manufactures, markets, and maintains industrial and commercial cogeneration systems for residential, commercial, recreational, and industrial use in the United States and internationally. It operates through three segments: Products, Services, and Energy Production. The company offers InVerde e+ and TecoPower, a cogeneration product that supplies electricity and hot water; TECOCHILL air-conditioning and refrigeration chillers; Tecofrost gas engine-driven refrigeration compressors; and water heaters under the Ilios brand name, as well as emissions control technology under the Ultera brand name. It also provides long-term maintenance contracts, parts sales, and turnkey installation services through a network of eleven field service centers in California, the Midwest, the Northeast, and the Southeast, as well as in Ontario, Canada. In addition, the company installs, owns, operates, and maintains distributed generation of electricity, energy, and other complementary systems. It serves hospitals and nursing homes, colleges, universities, health clubs, spas, hotels, motels, office and retail buildings, food and beverage processing facilities, and other commercial and industrial customers.

Espey Mfg. & Electronics Corp., a power electronics design and original equipment manufacturing company, designs, manufactures, and tests electronic equipment primarily for use in military and industrial applications in the United States and internationally. The company's principal products include power supplies, power converters, filters, power transformers, magnetic components, power distribution equipment, UPS systems, antennas, and high-power radar systems for use in AC and DC locomotives, shipboard power, shipboard radar, airborne power, ground-based radar, and ground mobile power applications. It also provides various services comprising design and development to specification, build to print, design services, design studies, environmental testing services, metal fabrication, painting services, and development of automatic testing equipment. In addition, the company produces individual components, such as inductors, printed circuit boards, wires, and tests items. It serves industrial manufacturers and defense companies, the government of the United States, foreign governments, and foreign electronic equipment companies through its direct sales and distribution channels. The company's

Pioneer Power Solutions, Inc., together with its subsidiaries, designs, manufactures, sells, and services electric power systems, distributed energy resources, used and new power generation equipment, and mobile EV charging solutions in the United States, Canada, and internationally. The company operates in two segments, Transmission & Distribution Solutions and Critical Power Solutions. The Transmission & Distribution Solutions segment provides electric power systems, including e-Bloc, and distributed energy resources that help customers effectively and efficiently protect, control, transfer, monitor, and manage their electric energy requirements. It also provides low voltage switchgears and transfer switches. The Critical Power Solutions segment provides new and used power generation equipment, and aftermarket field-services to ensure smooth and uninterrupted power to operations during times of emergency. The company serves utility, industrial, commercial, and backup power markets. The company was incorporated in 2008 and is headquartered in Fort Lee, New Jersey. Pioneer Power Solutions, Inc. is a subsidiary of Pioneer Power Solutions, Inc.
