The y-axis represents values in millions (M), ranging from -10,000 M to 50,000 M. The x-axis shows quarters from 2005 Q1 to 2022 Q1.

Key observations:

- Revenue shows a significant spike in 2013 Q1, reaching approximately 40,000 M.
- Revenue also shows a sharp increase in 2022 Q1, reaching approximately 28,000 M.
- Net income and operating cash flow are generally lower and more stable, with net income showing a notable dip in 2020 Q2.

The chart displays the employee count over time. The Y-axis is labeled with values 0.0, 5.0, 10.0, 15.0, 20.0, 25.0, 30.0, and 35.0, with a unit of 'M' (millions) indicated at the top right. The X-axis shows dates: 2014-02-28, 2016-08-31, 2019-02-28, and 2022-08-23. The data series is a blue line that starts at approximately 25.5 million in early 2014, rises to a peak of about 31.5 million in late 2016, and then fluctuates between 25 million and 29 million until the end of the period in late 2022.

The chart displays the financial structure of the top 100 companies from 2000 to 2020. The y-axis represents the amount in millions (M), ranging from 0 M to 16,000 M. The x-axis represents the year. The components are stacked as follows: longTermDebt (dark blue), shortTermDebt (teal), cashAndCashEquivalents (red), and totalStockholdersEquity (dark blue). The total debt (longTermDebt + shortTermDebt) shows a steady increase over the period, peaking around 2019 before a sharp decline. Cash and cash equivalents also show a general upward trend, with significant fluctuations. Total stockholders' equity remains relatively stable, contributing a consistent portion to the total.
