Tomra Systems ASA provides sensor-based solutions for optimal resource productivity worldwide. It operates through three divisions: Collection, Recycling Mining, and Food. The Collection division engages in the development, production, sale, and service of reverse vending machines and related data management systems. This segment is also involved in picking up, transporting, and processing empty beverage containers on behalf of beverage producers/fillers. The Recycling Mining division offers sorting systems for waste and metal material streams; and ore sorting systems for the mining industry. The Food Solutions division provides post-harvest grading and sorting solutions for fresh produce; and sorting and processing technology for the processed food industries. The company was founded in 1972 and is headquartered in Asker, Norway.

Renewi plc provides waste-to-product services in the United Kingdom, the Netherlands, Belgium, France, Germany, Hungary, Portugal, Canada, and Luxembourg. The company operates through Commercial Waste, Mineralz & Water, and Specialities segments. It is involved in the collection and treatment of commercial waste; industrial cleaning and treatment of hazardous waste; and operation of waste management facilities under long-term municipal contracts. The company also produces materials from waste streams, such as glass bottles, discarded electrical and electronic equipment, food waste, source separated organics, minerals, and incinerators' bottom ashes. In addition, it provides clean water and soil, and inert ash. Renewi plc serves factories, offices, hospitals, retail, shops, and restaurants; heavy industry, petrochemical sites, oil and gas production, and the food industry; and building and construction markets. The company was formerly known as Shanks Group plc and changed its name to Renewi plc in February 2017. Renewi plc was founded in 1880 and is headquartered in Milton Keynes, the United Kingdom.
