

Origin Materials, Inc. operates as a carbon negative materials company. Its proprietary platform technology converts biomass or plant-based carbon into chloromethylfurfural and hydrothermal carbon, as well as other minor products. The company is headquartered in West Sacramento, California.

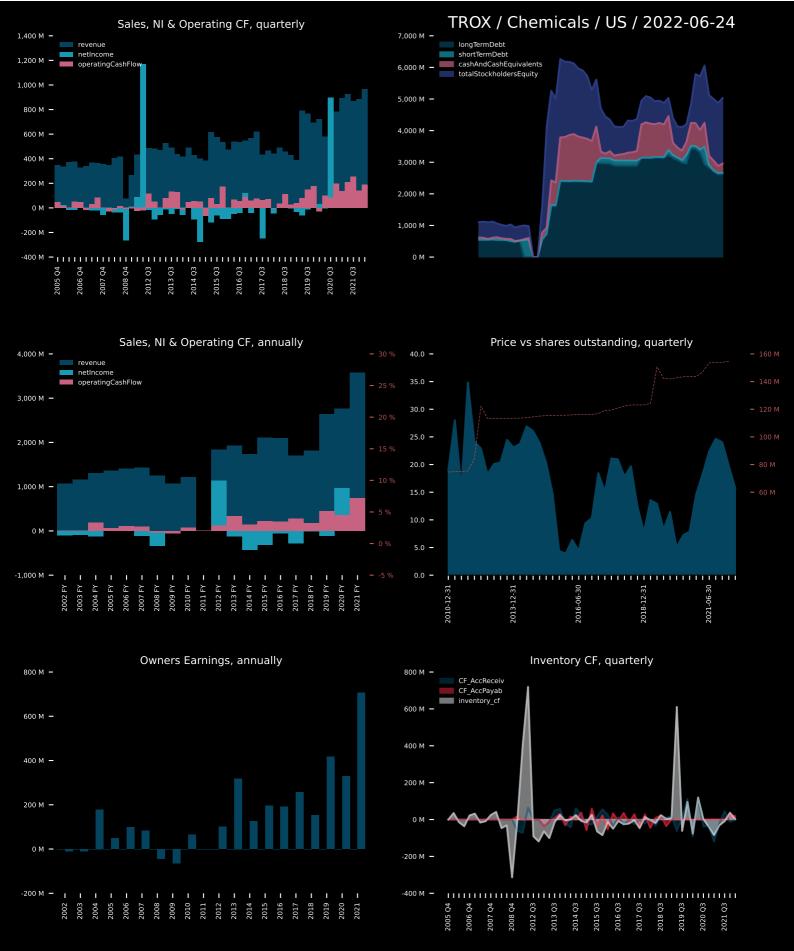

Univar Solutions Inc. distributes commodity and specialty chemical products, and provides related services worldwide. It offers epoxy resins, polyurethanes, titanium dioxide, fumed silica, esters, plasticizers, silicones, and specialty amines; ingredients for cleaners, detergents, and disinfectant products; and base stocks, performance-enhancing additives for lubricants and metalworking fluids. The company also distributes specialty and basic chemicals, and ingredients used in skin and hair care products; and commodity and specialty products for meat processing, baked goods, dairy, grain mill products, processed foods, carbonated soft drinks, fruit drinks, and alcoholic beverage markets, as well as provides excipients, solvents, reactants, active pharmaceutical ingredients, and intermediates to pharmaceutical ingredient producers.

Molecular Data Inc., through its subsidiaries, operates in the chemical e-commerce business in the People's Republic of China. The company operates technology-driven platform that connects participants along the chemical value chain through its integrated solutions. It delivers e-commerce solutions, financial solutions, warehousing and logistics solutions, and software-as-a-service suites for participants in the traditional chemical industry. The company offers its e-commerce solutions through online platform that consists of molbase.com and molbase.cn websites; Moku Data Weixin account; Chemical Community app; and other ancillary platforms. Molecular Data Inc. was founded in 2013 and is headquartered in Shanghai, the People's Republic of China.

Lithium & Boron Technology, Inc. manufactures and sells boric acid and related compounds for use in industrial and consumer applications in the People's Republic of China. The company was formerly known as SmartHeat Inc. and changed its name to Lithium & Boron Technology, Inc. in October 2019. Lithium & Boron Technology, Inc. was founded in 1954 and is based in Dachaidanzhen, the People's Republic of China.

Tronox Holdings plc operates as a vertically integrated manufacturer of TiO2 pigment in North America, South and Central America, Europe, the Middle East, Africa, and the Asia Pacific. The company operates titanium-bearing mineral sand mines; and engages in beneficiation and smelting operations. It offers TiO2 pigment; ultrafine specialty TiO2; zircon; feedstock; pig iron; titanium tetrachloride; and other products. The company's products are used for the manufacture of paints, coatings, plastics, and paper, as well as various other applications. Tronox Holdings plc is based in Stamford, Connecticut.

Kemira Oyj operates as a chemicals company in Finland, rest of Europe, the Middle East, Africa, the Americas, and the Asia Pacific. It operates in two segments, Pulp & Paper and Industry & Water. The Pulp & Paper segment develops and commercializes pulp, paper, and packaging chemicals, as well as a range of products for paper wet-end, including packaging and board, and tissue products. The Industry & Water segment offers coagulants, polymers, and other water treatment chemicals for raw water, waste water and sludge treatment, friction reduction, tailing treatment, mining processes, and oil recovery applications. Kemira Oyj was founded in 1920 and is headquartered in Helsinki, Finland.

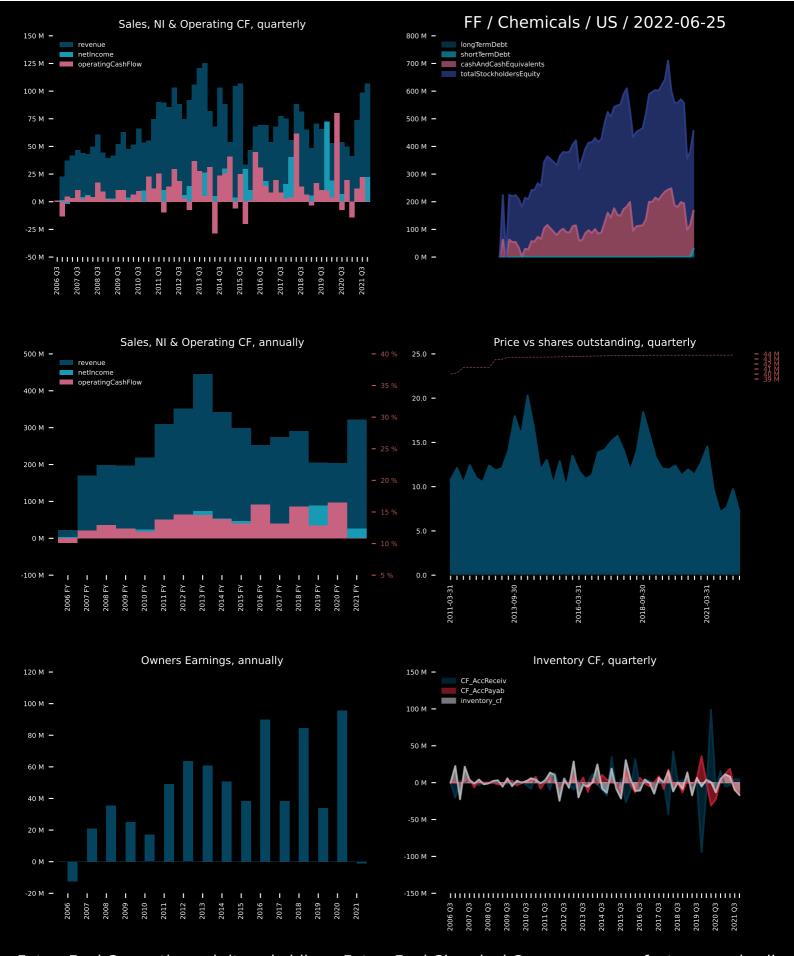

Westlake Chemical Partners LP acquires, develops, and operates ethylene production facilities and related assets in the United States. The company's ethylene production facilities primarily convert ethane into ethylene. It also sells ethylene co-products, including propylene, crude butadiene, pyrolysis gasoline, and hydrogen directly to third parties on either a spot or contract basis. Westlake Chemical Partners GP LLC serves as the general partner of the company. The company was incorporated in 2014 and is headquartered in Houston, Texas.

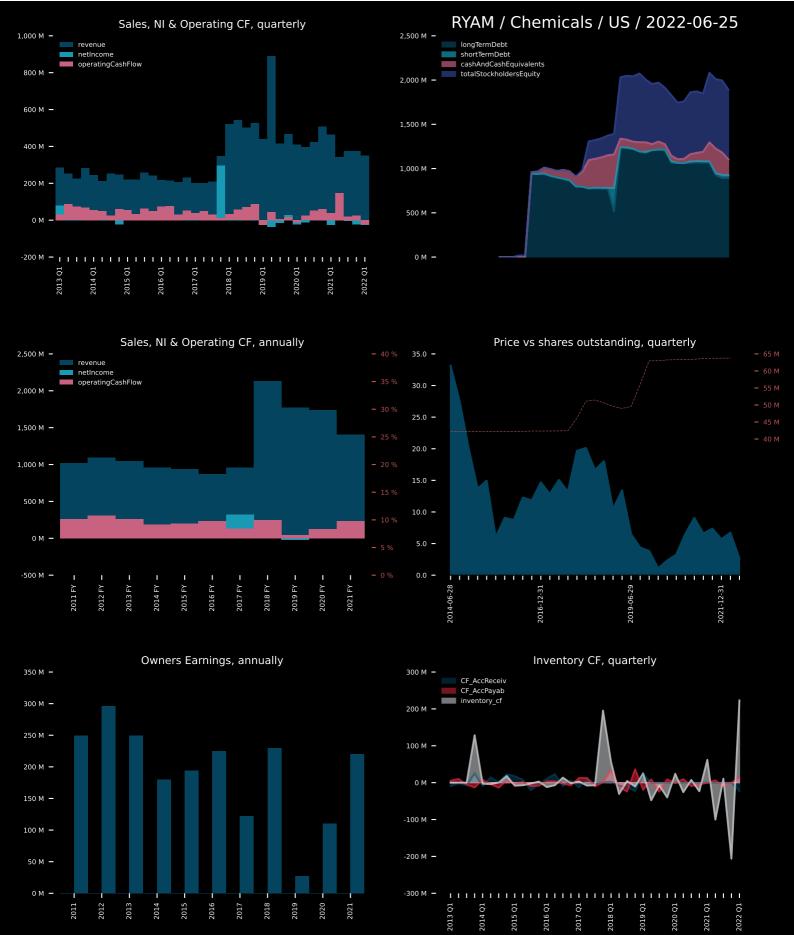

Dow Inc. provides various materials science solutions for packaging, infrastructure, mobility, and consumer applications in the United States, Canada, Europe, the Middle East, Africa, India, the Asia Pacific, and Latin America. It operates through Packaging & Specialty Plastics, Industrial Intermediates & Infrastructure, and Performance Materials & Coatings segments. The Packaging & Specialty Plastics segment provides ethylene, and propylene and aromatics products; and polyethylene, polyolefin elastomers, ethylene vinyl acetate, and ethylene propylene diene monomer rubbers. The Industrial Intermediates & Infrastructure segment offers ethylene oxides, propylene oxides, propylene glycol and polyether polyols, aromatic isocyanates and polyurethane systems, coatings, adhesives, sealants, elastomers, and composites. This

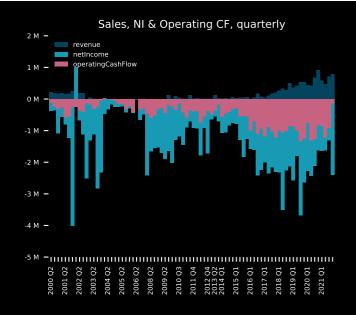

Huntsman Corporation manufactures and sells differentiated organic chemical products worldwide. The company operates through four segments: Polyurethanes, Performance Products, Advanced Materials, and Textile Effects. The Polyurethanes segment offers polyurethane chemicals, including methyl diphenyl diisocyanate, polyols, thermoplastic polyurethane, propylene oxide, and methyl tertiary-butyl ether products. The Performance Products segment manufactures amines and maleic anhydrides, including ethylene oxide, propylene oxide, glycols, ethylene dichloride, caustic soda, ammonia, hydrogen, methylamines, and acrylonitrile. The Advanced Materials segment offers epoxy, acrylic, polyurethane, and acrylonitrile-butadiene-based polymer formulations; high performance thermoset resins, curing agents, and toughoning agents, and carbon panetubes additives; and base liquid and solid

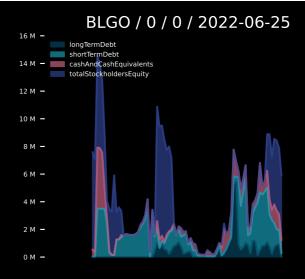

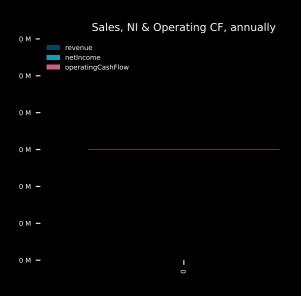

FutureFuel Corp., through its subsidiary, FutureFuel Chemical Company, manufactures and sells diversified chemical, bio-based fuel, and bio-based specialty chemical products in the United States. The company operates through two segments, Chemicals and Biofuels. The Chemicals segment provides various custom chemicals that are used in the agricultural chemical, coatings, chemical intermediates, industrial and consumer cleaning, oil and gas, and specialty polymers industries; and performance chemicals, such as polymer modifiers, glycerin products, and various specialty chemicals and solvents. The Biofuels segment is involved in the production and sale of biodiesel and petrodiesel blends; and the buying, sale, and shipping of refined petroleum products on common carrier pipelines. This segment markets its biodiesel products directly to customers through trucks, rail, and barges, FutureFuel Corp. is beadquartered in

Rayonier Advanced Materials Inc. manufactures and sells cellulose specialty products in the United States, China, Canada, Japan, Europe, Latin America, other Asian countries, and internationally. The company operates through High Purity Cellulose, Paperboard, and High-Yield Pulp segments. Its products include cellulose specialties, which are natural polymers that are used as raw materials to manufacture a range of consumer-oriented products, such as liquid crystal displays, impact-resistant plastics, thickeners for food products, pharmaceuticals, cosmetics, cigarette filters, high-tenacity rayon yarn for tires and industrial hoses, food casings, paints, and lacquers. The company also offers commodity products, such as commodity viscose pulp used in woven applications, including rayon textiles for clothing and other fabrics, as well as in non-woven applications comprising below wines.

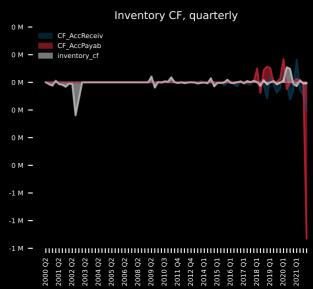

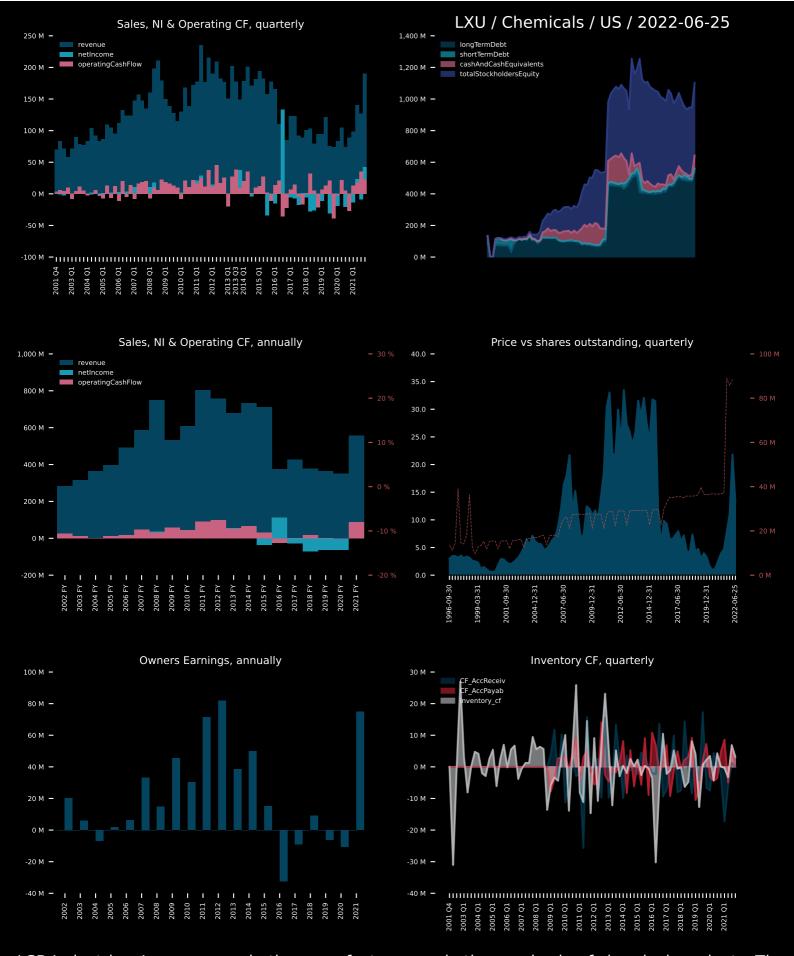

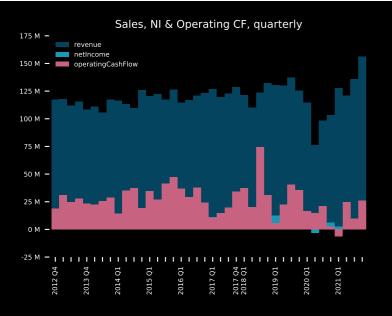

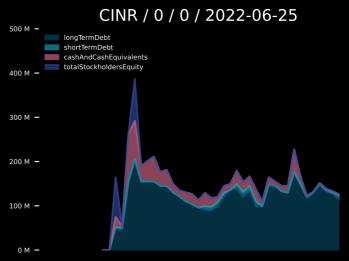

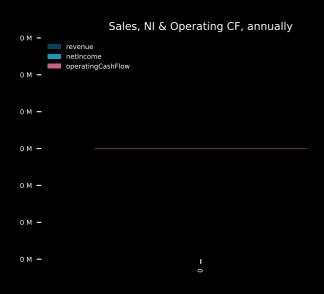

LSB Industries, Inc. engages in the manufacture, marketing, and sale of chemical products. The company provides nitrogen-based fertilizers, such as ammonia, fertilizer grade ammonium nitrate (HDAN), and urea ammonia nitrate for fertilizer and fertilizer blends for corn and other crops, and NPK fertilizer blends applications. It also offers high purity and commercial grade ammonia, high purity ammonium nitrate, sulfuric acids, mixed nitrating acids, carbon dioxide, and diesel exhaust fluids, as well as concentrated, and blended and regular nitric acids for various applications, including semi-conductor and polyurethane intermediates; pulp and paper, alum, water treatment, metals, and vanadium processing; power plant emissions abatement, water treatment, refrigerants, and metals processing; exhaust stream additive, and horticulture/grouphouse applications; and refrigeration, in addition, the company provides

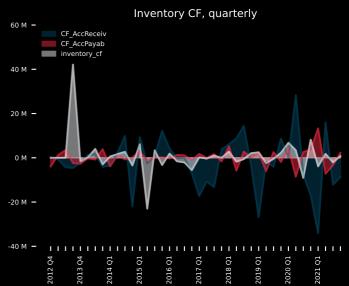

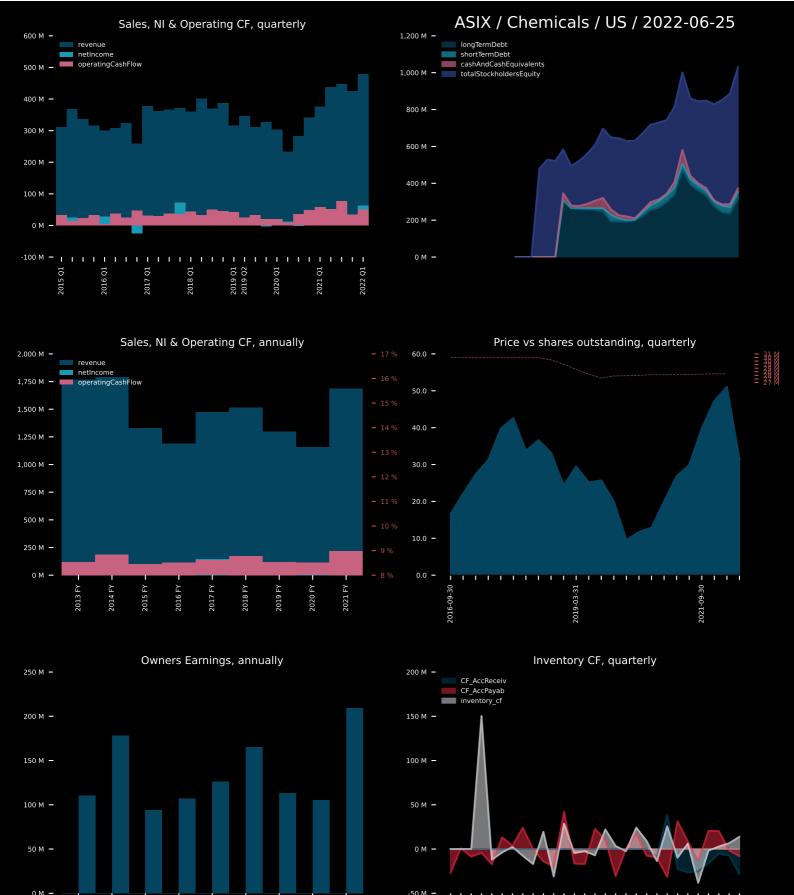

AdvanSix Inc. manufactures and sells polymer resins in the United States and internationally. It offers Nylon 6, a polymer resin, which is a synthetic material used to produce fibers, filaments, engineered plastics and films. The company also provides caprolactam to manufacture polymer resins; ammonium sulfate fertilizers to distributors, farm cooperatives, and retailers; and acetone that are used in the production of adhesives, paints, coatings, solvents, herbicides, and engineered plastic resins, as well as other intermediate chemicals, including phenol, alpha-methyl styrene, cyclohexanone, methyl ethyl ketoxime, acetaldehyde oxime, 2-pentanone oxime, cyclohexanol, sulfuric acid, ammonia, and carbon dioxide. It offers its products under the Aegis, Capra, Sulf-N, Nadone, Naxol, and EZ-Blox brands. The company sells its products directly, as well as through distributors. AdvanSix Inc. was incorporated in 2016 and

high performance engineered polymers in the United States and internationally. The company operates through three segments: Engineered Materials, Acetate Tow, and Acetyl Chain. The Engineered Materials segment develops, produces, and supplies specialty polymers for automotive and medical applications, as well as for use in industrial products and consumer electronics. It also offers acesulfame potassium, a sweetener for use in various beverages, confections, and dairy products; and food protection ingredients, such as potassium sorbate and sorbic acid for use in foods, beverages, and personal care products. The Acetate Tow segment provides acetate tows and flakes for use in filter products applications. The Acetyl Chain

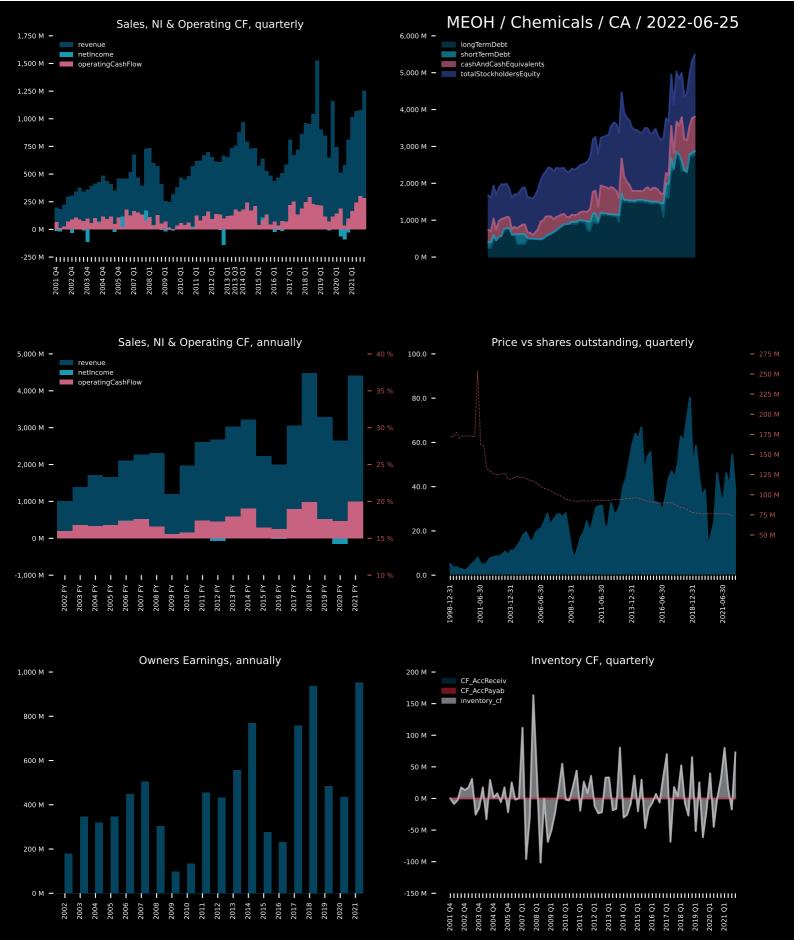

Eastman Chemical Company operates as a specialty materials company in the United States and internationally. The company's Additives & Functional Products segment offers hydrocarbon and rosin resins; organic acid-based solutions; amine derivative-based building blocks; metam-based soil fumigants, thiram and ziram based fungicides, and plant growth regulators; specialty coalescent, specialty and commodity solvents, paint additives, and specialty polymers; heat transfer and aviation fluids; insoluble sulfur and anti-degradant rubber additives; and performance resins. It serves transportation, personal care, wellness, food, feed, agriculture, building and construction, water treatment, energy, consumables, durables, and electronics markets. Its Advanced Materials segment provides copolyesters, cellulosic biopolymers,

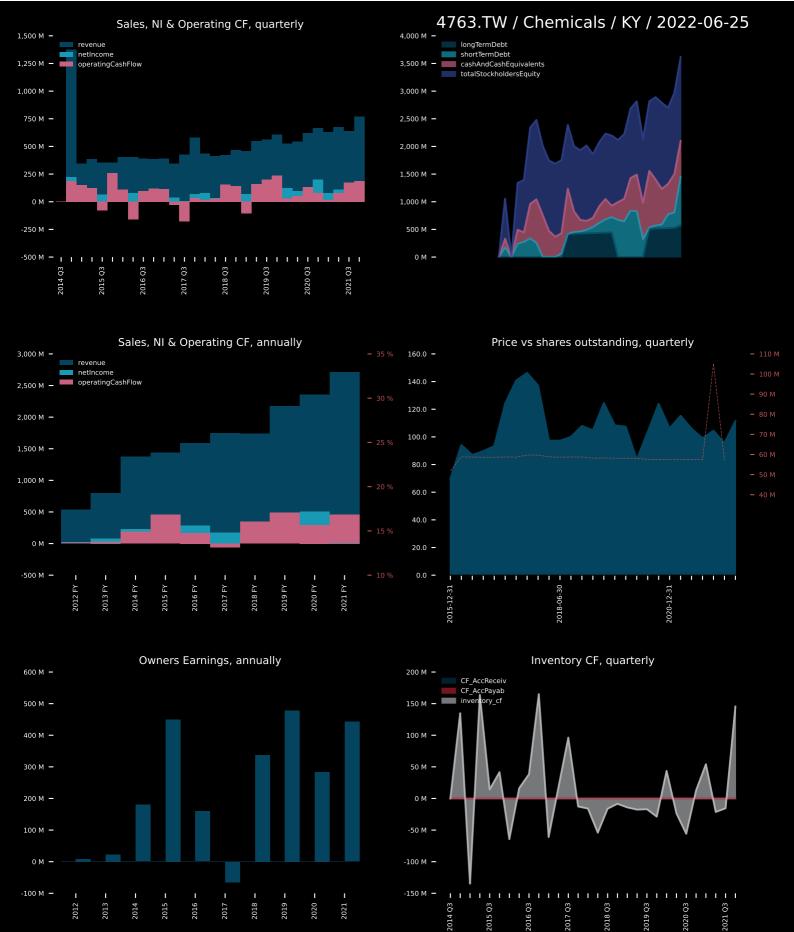

Valhi, Inc. engages in the chemicals, component products, and real estate management and development businesses in the Asia Pacific, Europe, North America, and internationally. The company's Chemicals segment produces and markets titanium dioxide pigments (TiO2), which are white inorganic pigments used in various applications by paint, plastics, decorative laminate, and paper manufacturers. It offers TiO2 under the KRONOS name through agents and distributors. The company's Component Products segment manufactures mechanical and electrical cabinet locks, and other locking mechanisms for use in ignition systems, mailboxes, file cabinets, desk drawers, tool storage cabinets, vending and cash containment machines, integrated inventory and access control secured narcotics boxes, medical cabinetry security, electronic circuit papels, storage compartments, and gas station socurity applications. It also

Jialijia Group Corporation Limited does not have significant operations. It intends to acquire, through a merger, capital stock exchange, asset acquisition, stock purchase, reorganization, exchangeable share transaction, or other similar business transaction with one or more operating businesses or assets. Previously, the company was provided vending and shipping services of electronic toys of various kinds manufactured in the Republic of China; and distribution of electronic kids toys of various price categories to small and medium-sized vendors. The company was formerly known as Rizzen, Inc. and changed its name to Jialijia Group Corporation in May 2018. Jialijia Group Corporation Limited was incorporated in 2015 and is based in Changzhou, China.

Methanex Corporation produces and supplies methanol in North America, the Asia Pacific, Europe, and South America. The company also purchases methanol produced by others under methanol offtake contracts and on the spot market. In addition, it owns and leases storage and terminal facilities. The company owns and manages a fleet of approximately 30 ocean-going vessels. It serves chemical and petrochemical producers. Methanex Corporation was incorporated in 1968 and is headquartered in Vancouver, Canada.

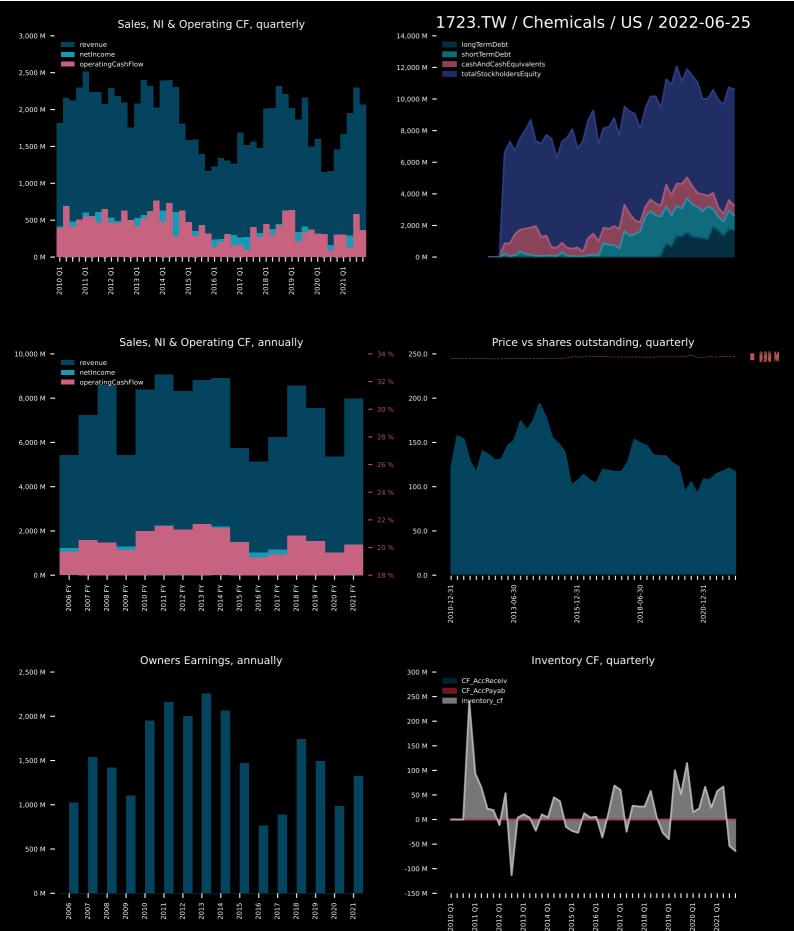

Jinan Acetate Chemical Co., Ltd. engages in the research and development, production, and sale of cellulose diacetate, cellulose acetate tows, and other related products in Asia, the United States, Africa, and Europe. Its products are used in cigarette filters, water-based pen refills, diaper absorbing lining, and clothes; and glasses frame and tool handles, etc. The company was founded in 1999 and is headquartered in Grand Cayman, the Cayman Islands.

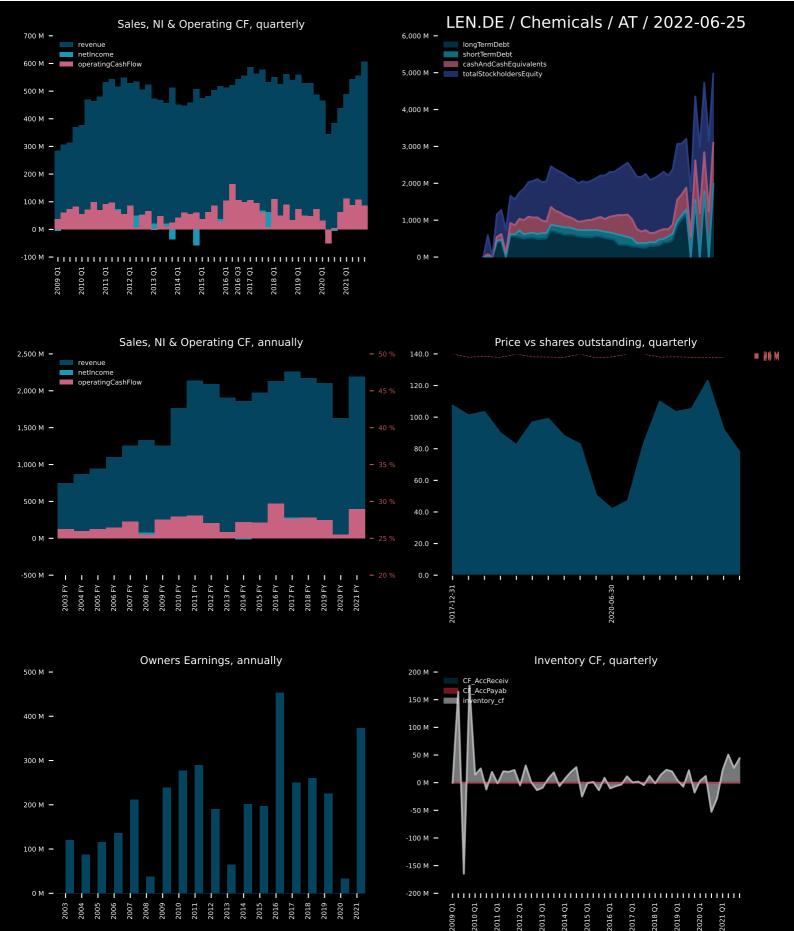

Solvay SA provides advanced materials and specialty chemicals worldwide. It operates through four segments: Materials, Chemicals, Solutions, and Corporate & Business Services. The Materials segment offers specialty polymers, including aromatic polymers, high barrier polymers, and fluoropolymers for the electronics, automotive, aircraft, and healthcare industries; and composite materials for aerospace engineered materials market. The Chemicals segment produces and sells soda ash and sodium bicarbonate primarily to the flat and container glass industries, as well as for use in detergents, pharmaceutical, and feed and food industries; hydrogen peroxide for use primarily in the paper industry to bleach pulp, as well as chemicals, electronics, food, mining, and environment; and dispersible silica for tire

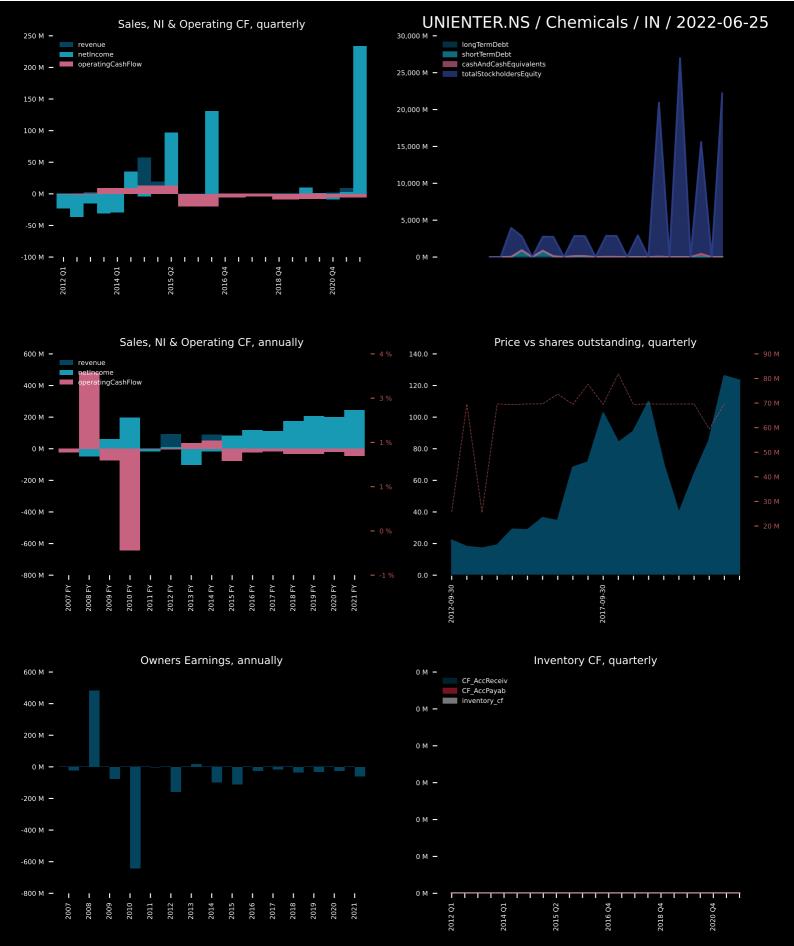

Solvac S.A. operates as an advanced materials and specialty chemicals company in Belgium. It offers specialty polymers, composite materials, soda ash, peroxides, and silica. The company was incorporated in 1983 and is headquartered in Brussels, Belgium.

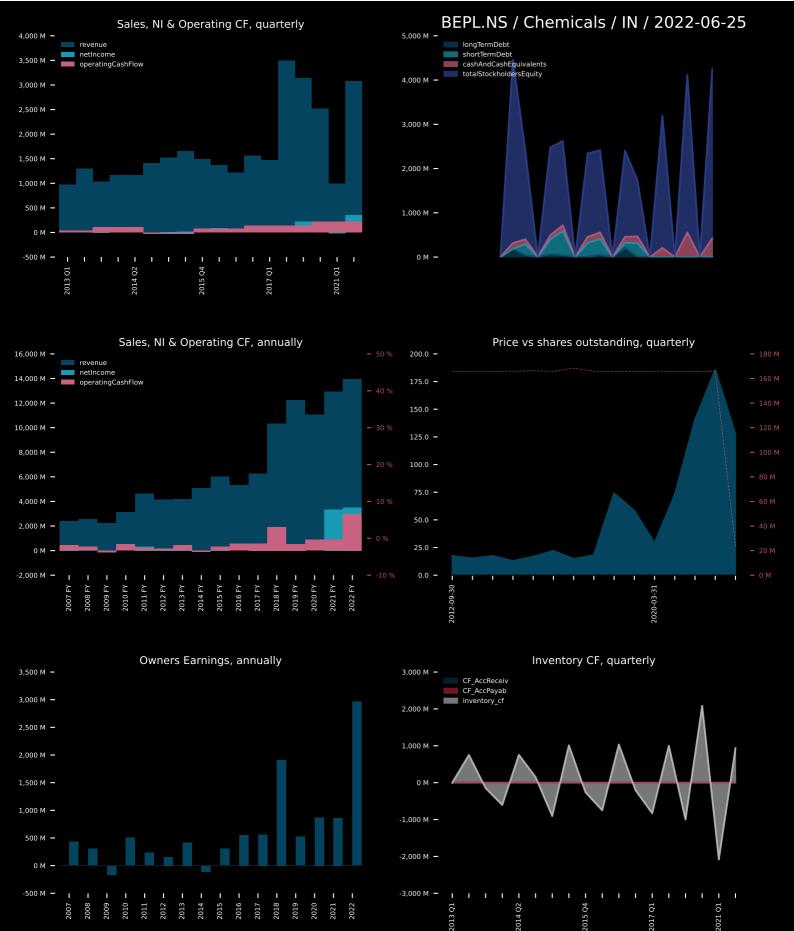

China Steel Chemical Corporation develops and sells specialty chemicals in Taiwan. The company provides coal tar series, which consists soft pitch, creosote oil, carbon black feed oil, wash oil, fine naphthalene, special pitch paint, wood preservative oil, refined oil, and naphthalene residual oil; light oil series products, which include benzene, toluene, non-aromatic oils, and xylene mixture; coke series products, which comprise anhydrous coke powder, nut coke, CDQ, and refined fine powder; and carbon materials series products, which include mesophase powders, mesophase carbon powders, high specific surface area activated carbon, refined pitch, binding carbon powder, high softening point pitch, and oem for graphitization, as well as provides sulfur, iron oxide powder, and carburant. It also exports its products to

Lenzing Aktiengesellschaft produces and markets wood-based cellulosic fibers for the textile and nonwoven sectors in Austria, rest of Europe, Asia, the Americas, and internationally. The company operates through Division Fiber, Division Pulp, and Others segments. It offers lyocell fibers for applications in sportswear, home textiles, and mattresses, as well as hygiene articles such as wet wipes and baby wipes; modal fibers; viscose fibers for use in clothing fabrics, wipes, tampons, and wound dressings; and filament yarns under the LENZING, TENCEL, VEOCEL, and LENZING ECOVERO brand names. The company also provides biorefinery products comprising acetic acid biobased, furfural biobased, magnesium lignosulphonate biobased, soda ash, sodium sulphate, and xylose. It also operates in the field of mechanical and plant engineering; engages in the training and personnal development activities; and provides opgineering services. The

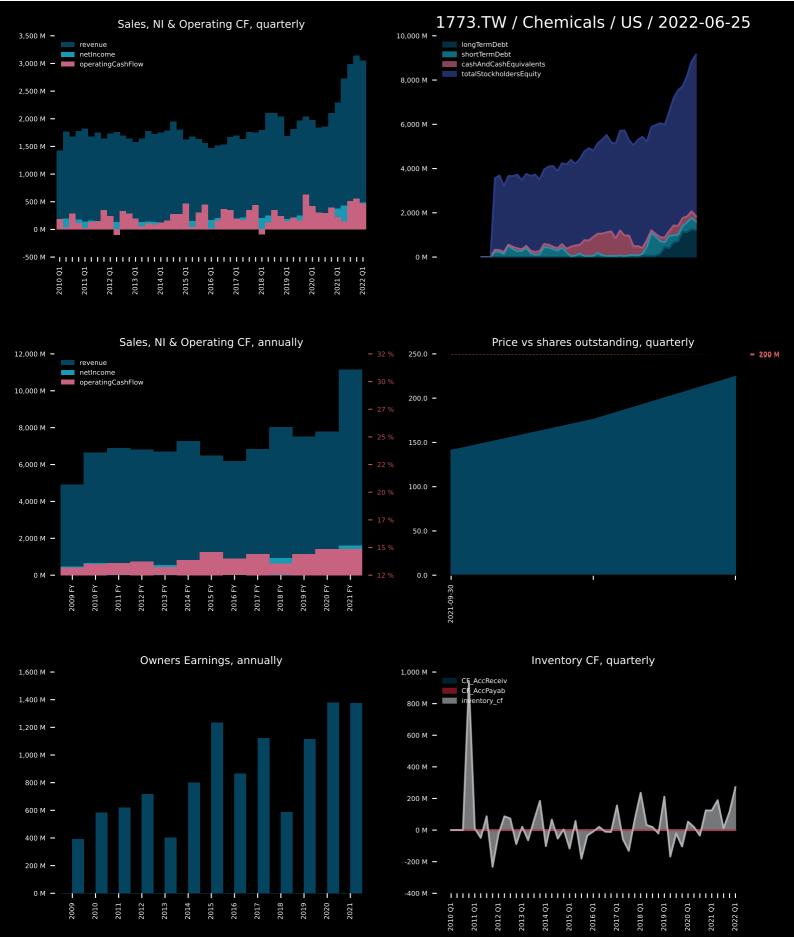

Uniphos Enterprises Limited engages in the trade of chemicals and other products in India. It also invests in quoted and unquoted securities. The company was incorporated in 1969 and is based in Mumbai, India. Uniphos Enterprises Limited is a subsidiary of Nerka Chemicals Private Limited.

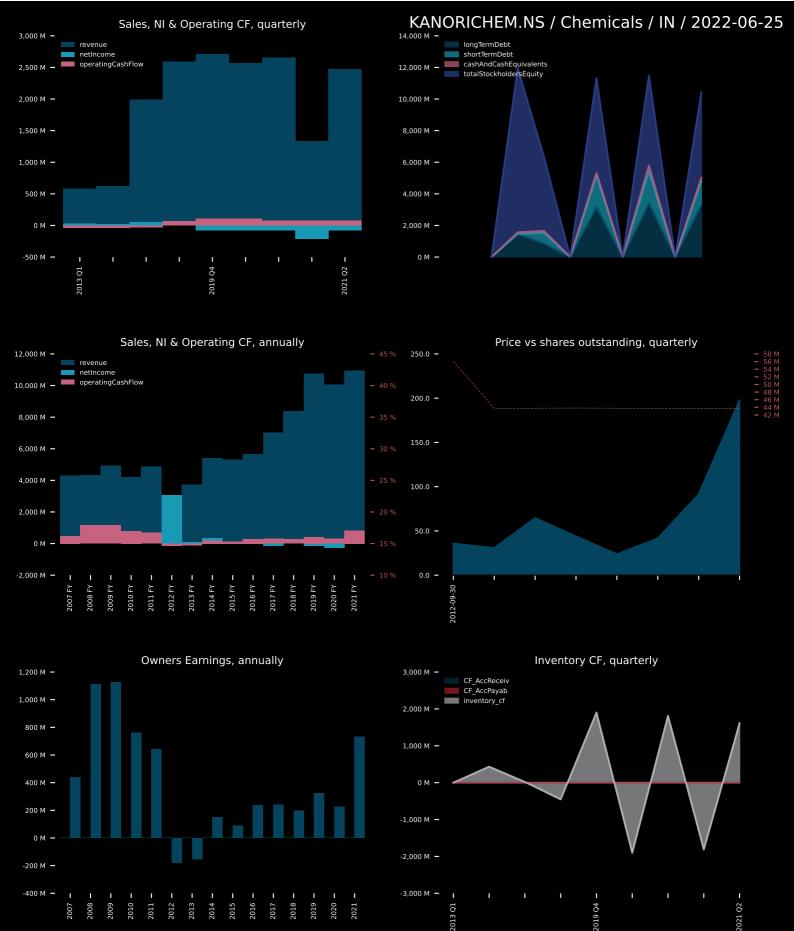

Bhansali Engineering Polymers Limited operates a petrochemical company in India and internationally. The company manufactures and sells acrylonitrile butadiene styrene (ABS) and styrene acrylonitrile (SAN) resins, as well as high rubber graft. Its products include general purpose, heat resistant, flame retardant, transparent, and extrusion ABS resins for automotive, home appliances, packaging, electronics, healthcare, and electrical applications; and general and high lubrication SAN resins for stationery items and cosmetic packaging applications. The company also provides general purpose, heat resistant, and direct metalizing acrylonitrile styrene acrylate resins for automotive and construction applications; and heat resistant, extrusion, and paintable polycarbonate-ABS resins for automotive, electronics, household, construction healthcare packaging and luggage (suitease applications in addition, it offers

The Andhra Sugars Limited, together with its subsidiaries, manufactures and sells sugar, and organic and inorganic chemicals in India. The company operates through Sugars, Chlor Alkali, Power Generation, Industrial Chemicals, and Others segments. It offers chemicals and fertilizers, including caustic potash, caustic soda, ethanol, hydrochloric acid, hydrogen gas, liquid chlorine, poly aluminum chloride, potassium carbonate, industrial alcohol, sodium hypochlorite, sulphuric acid, and super phosphate. The company also provides aspirin products, including salicylic acids, sodium salicylate, and aspirin starch granules, as well as aspirin IP, USP, and BP products. In addition, it offers soaps, fatty acids, acetic acids, liquid propellants, bulk drugs, edible oils, transportation receipts, etc.; and liquid hydrogen, UH 25 and MMH, and HTPB products. Further,

Shiny Chemical Industrial Company Limited manufactures and sells electronic and industrial solvents in Taiwan. The company's electronic solvents include menthyl acetates, ether alcohol esters, other solvents, and customized products; and industrial solvents comprise menthyl acetates, ether ester products, and other solvents. It also provides fumalin and urea glue; and leases storage tanks. The company was founded in 1979 and is based in Kaohsiung, Taiwan.

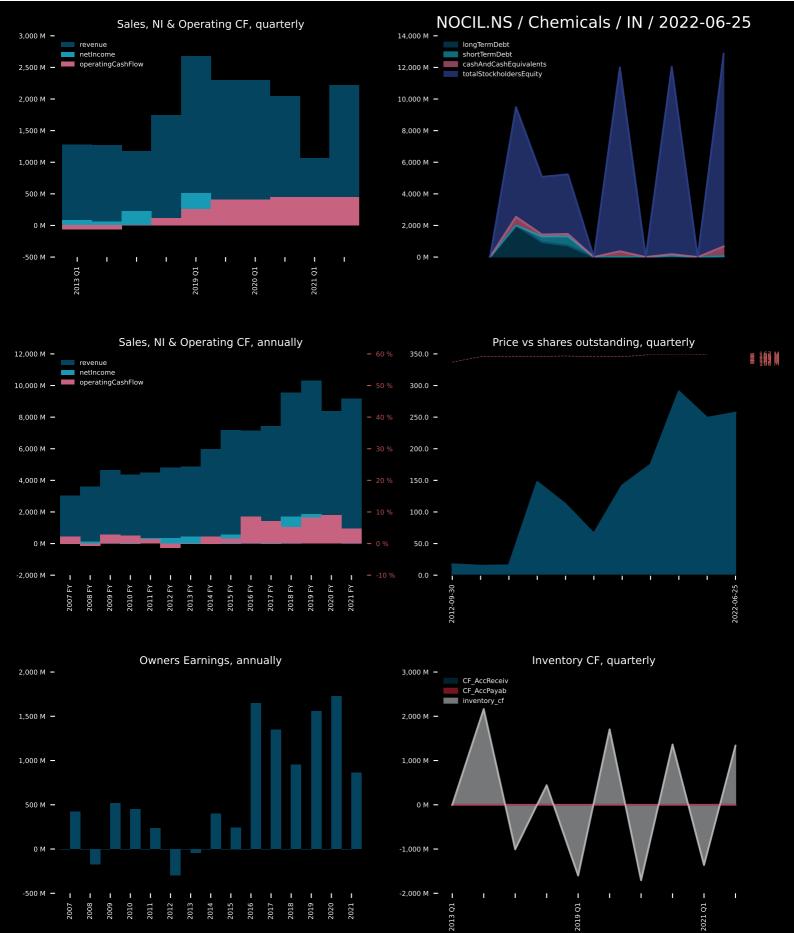

Kanoria Chemicals & Industries Limited manufactures and sells chemical intermediates in India. The company operates through Alco Chemicals, Solar Power, Electronic Automotive, and Textile segments. It provides chemicals, such as acetaldehyde, di-pentaerythritol, formaldehyde, hexamine, pentaerythritol, phenolic resins, and sodium formate products. The company also develops and sells electronic and mechatronic modules, and control devices for the automotive, consumer goods, power tool electronics, and building automation industries. In addition, it operates a solar power plant with a generation capacity of 5 MW in Jodhpur district, Rajasthan; and manufactures and sells yarn and denim. Kanoria Chemicals & Industries Limited also exports its products. The company was incorporated in 1960 and is based in New Delhi, India.

Rain Industries Limited, together with its subsidiaries, manufactures and sells carbon, cement, and advanced materials products in India and internationally. The company operates through Carbon, Advanced Materials, and Cement segments. It offers calcined petroleum coke, coal tar pitch, and green petroleum coke, as well as other derivatives of coal tar distillation, including carbon black oil, creosote oil, naphthalene, and other aromatic oils; naphthalene derivatives comprising phthalic anhydride, polynaphthalene sulfonates, and modifiers; petrochemical intermediates, such as benzene, toluene, and xylene; hydrocarbon resins, coal tar-based resins, colorless resins, and phenolics; and engineered products, including binders and pavement sealers, as well as superplasticizers. The company also engages in the co-generation of energy.

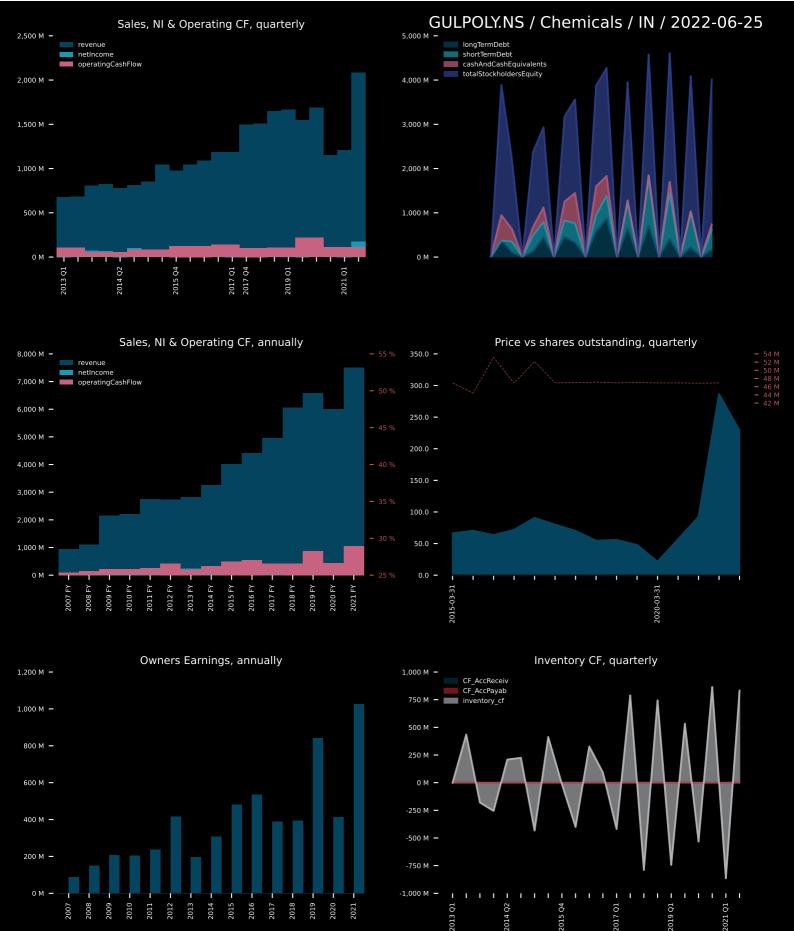

Dottikon Es Holding AG manufactures and sells performance chemicals, intermediates, and active pharmaceutical ingredients for the chemical and pharmaceutical industries in Switzerland and internationally. The company's chemicals and intermediates include amines, anilines, azaindoles, benzimidazoles, benzoic acid derivatives, benzyl compounds, boron building blocks, chiral compounds, cyclohexane derivatives, cyclopropyl building blocks, indazoles, indoles, N-heterocycles, nitrate esters, nitroaromatic compounds, O-heterocycles, phenols and anisoles, and pyridine building blocks. It also provides Dottisol, an isosorbide dimethyl ether for application as a solubility enhancer in cosmetic, and pharma and agro products, as well as a performance additive in various industries. In addition, the company engages in the recycling

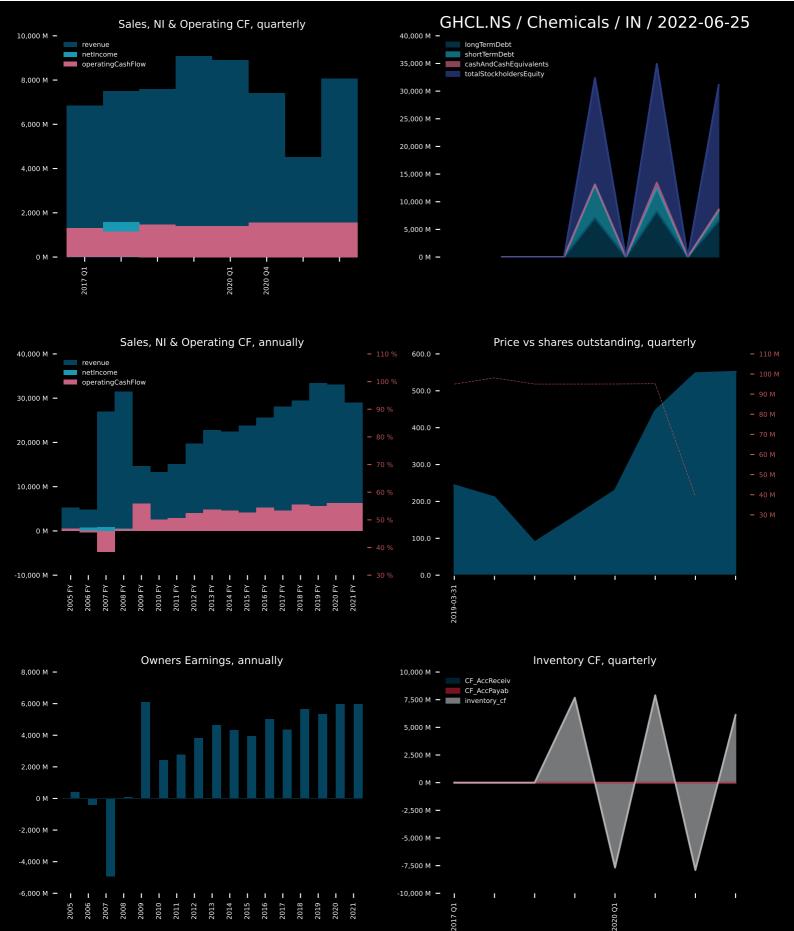

NOCIL Limited engages in the manufacture and sale of rubber chemicals in India. The company offers accelerators, anti-degradants, antioxidants, pre vulcanization inhibitors, and post vulcanization stabilizers. Its products are used in tire and other rubber processing industries. The company also exports its products. NOCIL Limited was incorporated in 1961 and is headquartered in Mumbai, India.

Sree Rayalaseema Hi-Strength Hypo Limited engages in the production and sale of chemicals in India. The company operates through two segments, Chemical Manufacturing and Power generation. It provides sulphuric, chlorosulphonic, hydrochloric, and monochloro acetic acids; chloramine, purichlor, oleum, sodium dichloroisocyanurate, hydrogen gases; and aluminum sulphate, stable bleaching powder, sodium hydride, sodium methoxide powder, sodium methoxide solution, calcium hypochlorite, and water treatment chemicals. The company is involved in the generation and distribution of power through thermal, solar, and wind mills; and coal trading business. It also exports its products. Sree Rayalaseema Hi-Strength Hypo Limited was incorporated in 2005 and is based in Kurnool, India.

Gulshan Polyols Limited engages in the mineral and grain processing, and distillery businesses in India and internationally. The company provides starch sugar products, such as sorbitol 70% solution, dextrose monohydrate, malto dextrine powder, and liquid glucose, as well as rice fructose syrups, brown rice syrups, and rice syrup solids; organic sweeteners; and activated, precipitated, and ground calcium carbonate products. It also offers grain based extra neutral alcohol, ethanol from damaged food grain, country liquor, bottling, sanitizers, and dried distillers grain solids, as well as alcoholic beverages under the Tiger Gold and Golden deer brands; and manufactures agro based animal feed products comprising corn/maize gluten feed, corn germ, cattle feed/enriched fiber, rice protein/gluten, and corn steep liquor products. In addition, the

GHCL Limited, together with its subsidiaries, manufactures and sells inorganic chemicals and home textile products in India. It offers light soda ash, a basic industrial alkali chemical used in soap and detergents, pulp and paper, iron and steel, aluminum cleaning compounds, water softening and dyeing, in fiber-reactive dyes, effluent treatment, and chemicals products; dense soda ash for use in glass manufacturing, silicate, ultramarine, and other chemical industries under the LION brand name. The company also provides refined sodium bicarbonate for use in food, food dyes, poultry and animal feed, leather tanning, fire extinguishers, vegetable cleaning, blasting of metals, manufacture of chemicals, pharma, deodorizers, and personal care products. In addition, it manufactures and sells edible and industrial grade salt, as well as markets honey and spices under the interest the company manufactures and experts cotton yarn

Gujarat Narmada Valley Fertilizers & Chemicals Limited manufactures and markets fertilizers and chemicals in India and internationally. It offers fertilizers, such as neem coated urea, ammonium nitrophosphate, neem de-oiled cake, Neem Manure, and neem pesticides under the NARMADA brand; and various neem based products, including soaps, hand and face wash products, and shampoos. The company also trades in muriate of potash, di-ammonium phosphate, ammonium sulphate, single super phosphate, and city compost. In addition, it provides industrial chemicals, such as methanol, acetic acid, toluene di? isocyanate, aniline, concentrated nitric acid, weak nitric acid, formic acid, ammonium nitrate, ethyl acetate, methyl formate, calcium carbonate, nitrobenzene, catsol, and technical grade urea, as well as other products comprising hydrochloric acid, liquid nitrogen, ortho toluene diamine, meta toluene

Deepak Fertilisers And Petrochemicals Corporation Limited produces and sells fertilizers and industrial chemicals in India. It operates through Chemicals, Bulk Fertilisers, Realty, and Windmill segments. The Chemicals segment offers ammonia, methanol, dilute nitric acid, concentrated nitric acid, carbon dioxide, and technical ammonium nitrate. The Bulk Fertilisers segment provides iso-propyl alcohol, propane, bulk and speciality chemical, nitro phosphate, mutriate of potash, diammonium phosphate, single super phosphate, sulphur, micronutrients, ssf, and bio fertilisers. The Realty segment is involved in the real estate business. The Windmill segment generates electricity through windmills. The company also exports its products to approximately 27 countries across 6 continents. The company was incorporated in 1979 and is beadquartered in Pupe, India.

Bachem Holding AG provides products for research, clinical development, and commercial application to pharmaceutical and biotechnology companies worldwide. The company engages in the development, production, and regulatory support of peptide active pharmaceutical ingredients, such as peptide and oligonucleotide new chemical entities (NCEs). It also offers commercial NCEs and generics; and project management, quality and regulatory, analytical, good manufacturing practice production, research grade production, and supply and vertical integration services. The company was founded in 1971 and is headquartered in Bubendorf, Switzerland. Bachem Holding AG is a subsidiary of Ingro Finanz AG.

Supreme Petrochem Limited manufactures and sells polystyrene, expandable polystyrene, specialty polymers and compounds, and extruded polystyrene foam boards (XPS) in India and internationally. It provides general purpose, high impact, and expandable polystyrene products; white, black, color, additive, and performance/nucleating masterbatches and compounds of styrenics and other polymers; styrene methyl methacrylate for household, molding, sheet extrusion, and extrusion profiles applications; and XPS INSUboard. The company exports its products to approximately 100 countries. Supreme Petrochem Limited was incorporated in 1989 and is based in Mumbai, India.

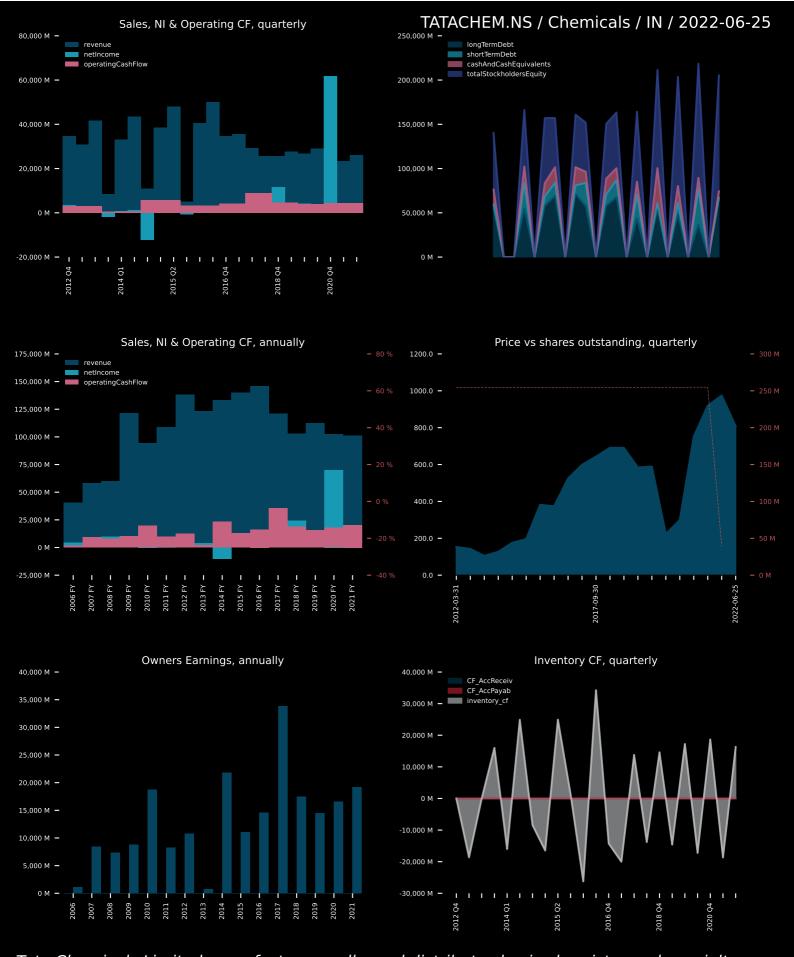

Gujarat Alkalies and Chemicals Limited engages in the production and sale of various chemical products in India. It provides caustic soda lye, soda flake, and soda prill, liquid chlorine, hydrochloric acid, and compressed hydrogen gas; anhydrous aluminum chloride, chlorinated paraffin, benzyl alcohol, benzaldehyde, and benzyl chloride; and Chloromethane. The company also offers caustic potash lye and flakes, and potassium carbonate; methylene chloride, chloroform, and carbon tetrachloride; and phosphoric acid and chlorinated paraffin wax. In addition, it provides hydrogen peroxide; and bleachwin, scalewin, poly aluminum chloride, biowin, and stable bleaching powder. The company's products are used in various industries, such as textile, pulp and paper, soap and detergent, alumina, water treatment, petroleum,

Robertet SA produces and sells perfumes, aromas, and natural products worldwide. Its products primarily include raw materials, fragrances, flavors, organic essential oils, and active ingredients. The company was founded in 1850 and is headquartered in Grasse, France.

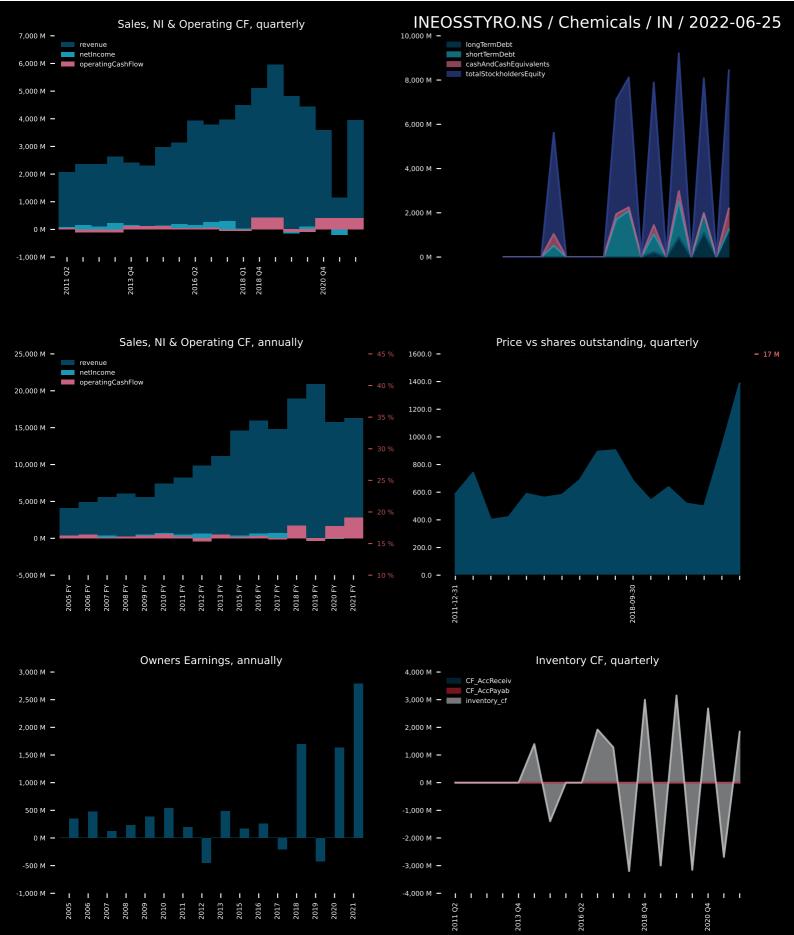

Oriental Carbon & Chemicals Limited engages in the manufacture and sale of insoluble sulphur worldwide. It operates through two segments, Chemicals and General Engineering Products. The company offers insoluble sulphur under the Diamond Sulf brand. It also provides commercial and battery grade sulfuric acid, and oleum for use in the fertilizer, detergent, and battery industries. In addition, the company offers off-highway tire accessories, pneumatics, hydraulics, and valve automation systems. The company was incorporated in 1978 and is based in Noida, India.

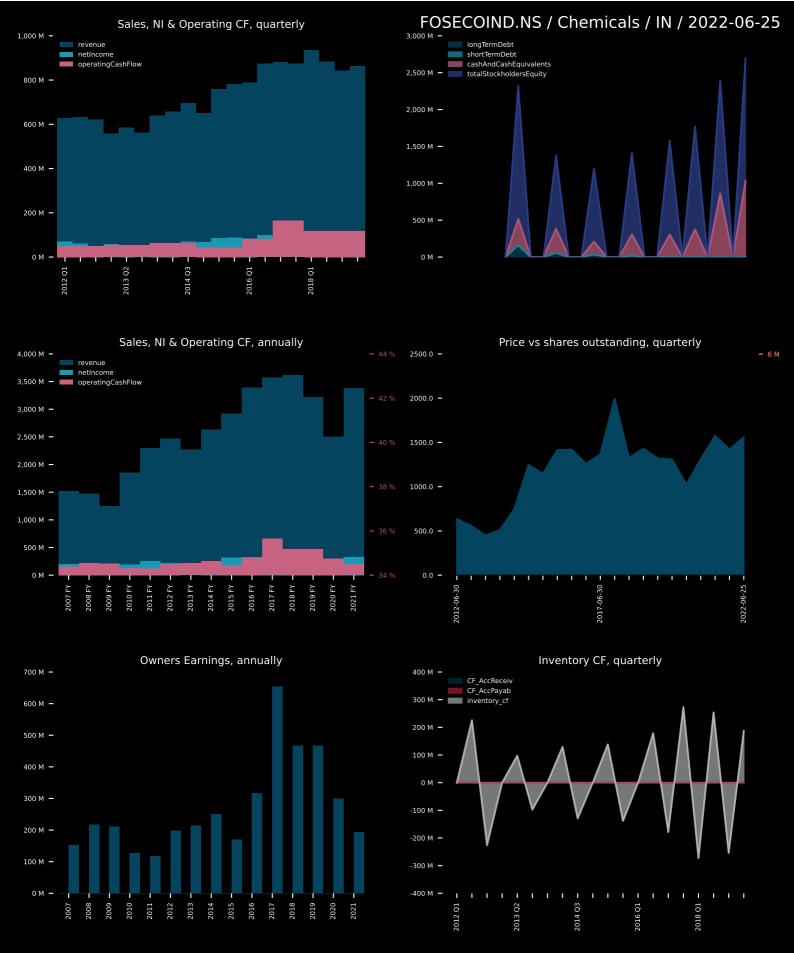

Tata Chemicals Limited manufactures, sells, and distributes basic chemistry and specialty products in India, Europe, Africa, the United States, rest of Asia, and internationally. It offers dense and light soda ash; crushed refined soda; Portland and masonry cement under the Tata Shudh brand name; salt; pharmaceutical grade, food grade, and animal feed grade sodium bicarbonate, as well as technical and refined grade sodium bicarbonate; and allied chemicals, such as caustic soda, bromine-based products, and gypsum, as well as marine chemicals and nutrition solutions. In addition, it offers specialty products, including nano zinc oxides for various industrial and cosmetic applications; and silica. Further, the company provides fungicides, insecticides, pesticides, herbicides, plant growth nutrients, crop protection solutions, and seeds, as well as agri input solutions; and rups farmer connect initiative under the Pallis Kisan Kutumb

India Glycols Limited, a green petrochemical company, manufactures and sells industrial chemicals in India. The company operates through Industrial Chemical, Ethyl Alcohol, and Nutraceuticals segments. It offers monoethylene, diethylene, and triethylene glycols; polyethylene glycols; fatty alcohol, acid, and amine ethoxylates; alkyl phenol ethoxylates; castor/natural oil ethoxylates; and ethoxylated and propoxylated co-polymers. The company also provides polysorbates; glycol ethers and acetates; brake fluids and anti-freeze coolants; performance chemicals; natural gums, including guar gums and other hydrocolloid products; extra neutral alcohols/rectified spirits; Indian-made foreign liquor; and alcohol-based hand sanitizers. In addition, it offers natural active pharmaceutical ingredients, standardized betapical extracts, and spice extracts; and industrial gases, such as liquid exygen, argon

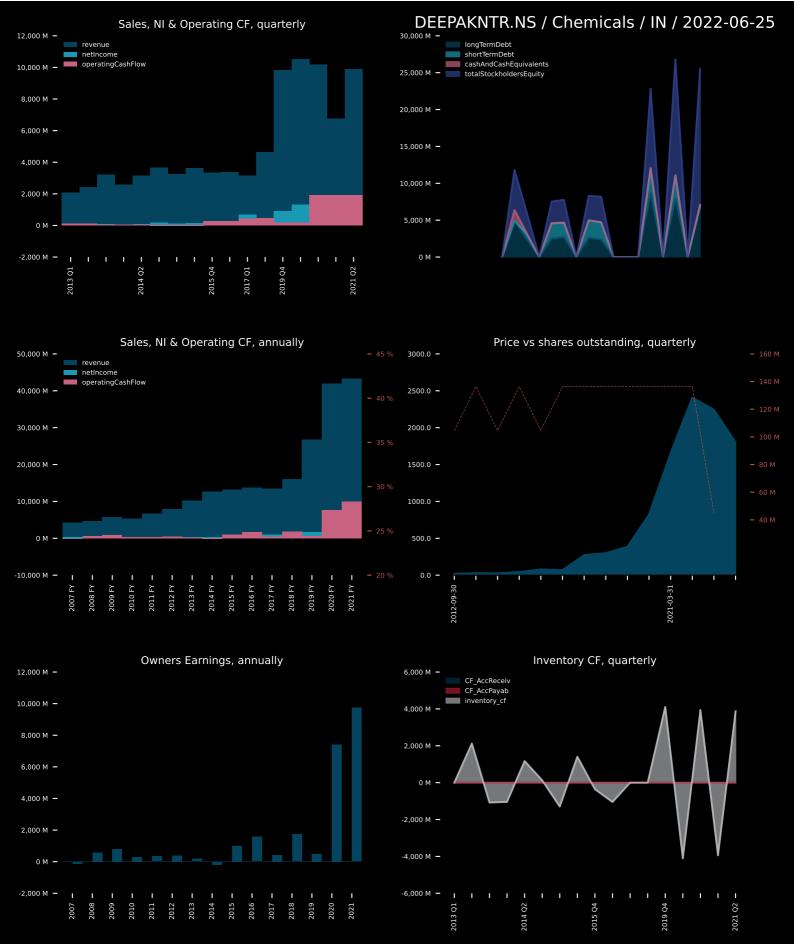

INEOS Styrolution India Limited engages in the manufacture, trading, and sale of engineering thermoplastics in India and internationally. It operates in Specialties and Polystyrene segments. The company's products include Absolac, a plastic resin that is used for manufacturing of home appliances, automobile interiors and exteriors, consumer durables, business machines, and office equipment; Absolan, a polymerized plastic resin, which is primarily used in lightings, stationeries, novelties, refrigerators, cosmetic packing, industrial goods, electrical appliances, cosmetic jars, and household applications; and Luran, an acrylonitrile styrene acrylate polymer that is used for automobile interiors and exteriors, PVC cap stocks, and household applications. Its products also comprise Novodur, a material for heat resistance and aesthetics, which is used in automobile interiors and exteriors bousing yacuum cleaners, and coffee machines; general

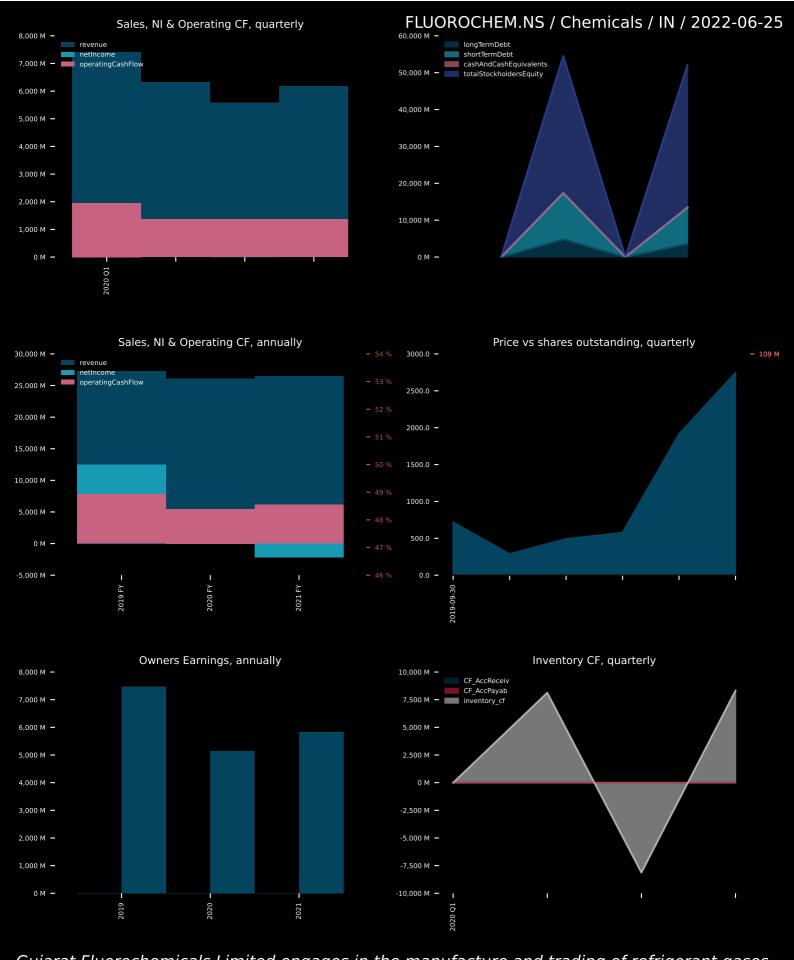

Foseco India Limited manufactures and sells additives and consumables used in the metallurgical industry in India. It also exports its products. The company was founded in 1932 and is based in Pune, India. Foseco India Limited is a subsidiary of Foseco Overseas Limited.

Punjab Chemicals and Crop Protection Limited manufactures and sells agrochemicals and specialty chemicals, and bulk drugs and its intermediates in India, Europe, Japan, and internationally. The company provides agrochemicals, such as herbicides, insecticides, and fungicides; pharmaceutical products, including APIs, intermediates, antioxidants, and intermediates for APIs; fine and specialty chemicals; basic and industrial chemicals; and phosphorus derivatives and phosphates. It also imports and sells chemicals; and offers contract manufacturing services for multinational companies. The company was incorporated in 1975 and is based in Mumbai, India.

Deepak Nitrite Limited manufactures and sells basic chemicals, fine and speciality chemicals, performance products, and phenolics in India. The company offers intermediates for colorants, rubber chemicals, explosives, dyes, pigments, food colors, pharmaceuticals, petrol and diesel blending, and agrochemicals. It also provides products for agro-chemicals, colorants, pigments, pharmaceuticals, and personal wellness products. In addition, the company offers optical brighteners; and products for paper, detergent, coating, and textile industries. Further, it provides phenols, cumene, isopropyl alcohol, and acetone. The company also exports its products primarily to Europe, the United States, Japan, Latin America, the Middle East, and the Far East. Deepak Nitrite Limited was incorporated in 1970 and is headquartered in Vadodara, India.

Gujarat Fluorochemicals Limited engages in the manufacture and trading of refrigerant gases, caustic soda, chloromethane, polytetrafluoroethylene (PTFE), fluoropolymers, fluoromonomers, specialty fluorointermediates, specialty chemicals, and allied activities in India, Europe, the United States, and internationally. It provides carbon tetrachloride, chlorine, methylene di chloride, hydrochloric acid, sodium hydrogen sulphate, hydrogen gas, fluorspar, and chloroform. The company offers its products under the Inoflon, Fluonox, Inoflar, Inolub, and Refron brands. Gujarat Fluorochemicals Limited exports its products to approximately 75 countries. The company was formerly known as Inox Fluorochemicals Limited and changed its name to Gujarat Fluorochemicals Limited in July 2019. The company was incorproated in 1987 and is

BASF India Limited provides chemicals, materials, industrial solutions, surface technologies, nutrition and care, and agricultural solutions in India. Its Agricultural Solutions segment provides crop protection products, such as insecticides, herbicides, fungicides, and plant growth regulators. The company's Chemicals segment provides petrochemicals, such as oxo-alcohols, acrylic acid, acrylic monomers, and plasticizers; and intermediate chemicals for pharmaceuticals, agrochemicals, coatings, food and feed, flavor and fragrance, surfactants, rubber chemicals, textiles, personal care, adhesives, dyes, etc. Its Materials segment offers performance chemicals, such as polyurethane, engineering, and specialty plastics; and monomers comprising basic raw materials for polyurethanes, inorganics and polyamides, as well as its procursors. The company's Industrial Solutions segment provides dispersions, regins

Navin Fluorine International Limited manufactures and sells specialty fluorochemicals in India and internationally. The company offers refrigerants to OEMs, service technicians, and equipment owners under the Mafron brand name for use in various applications, including window and split room air conditioners, chillers, packaged air conditioners, commercial and industrial refrigeration units, intermediate for API's, fluoropolymer resins, domestic and industrial refrigerators, and mobile air conditioning. It also provides inorganic fluoride products, such as ammonium bifluoride, potassium fluoride, sodium fluoride, potassium fluorotitanate, potassium fluoroborate, hexafluorophosphoric acid, and HF pyridine and HF urea complex products that are used in various industries comprising oil and gas, stainless steel,
